THE FUND

The Toews Agility Shares Dynamic Tactical Income ETF (the "Fund") is a diversified series of Northern Lights Fund Trust, a Delaware statutory trust organized on January 19, 2005 (the "Trust"). The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the "Board" or "Trustees"). Under the Trust's Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the "1940 Act") and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

The Fund's investment objective, restrictions and policies are more fully described here and in the Prospectus. The Board may start other series and offer shares of a new fund under the Trust at any time.

The Fund will issue and redeem Shares at net asset value ("NAV") only in aggregations of 25,000 Shares (each a "Creation Unit"). The Fund will issue and redeem Creation Units principally in exchange for an in-kind deposit of a basket of designated securities (the "Deposit Securities"), together with the deposit of a specified cash payment (the "Cash Component"), plus a transaction fee. The Fund is listed on NYSE Arca, Inc (the "Exchange"). Shares will trade on the Exchange at market prices that may be below, at, or above NAV. In the event of the liquidation of the Fund, a share split, reverse split or the like, the Trust may revise the number of Shares in a Creation Unit.

The Fund reserves the right to offer creations and redemptions of Shares for cash. In addition, Shares may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Trust cash equal to up to 115% of the market value of the missing Deposit Securities. In each instance of such cash creations or redemptions, transaction fees, may be imposed and may be higher than the transaction fees associated with in-kind creations or redemptions. See PURCHASE, REDEMPTION AND PRICING OF SHARES below.

Exchange Listing and Trading

Shares of the Fund are available to the public on the Exchange and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of shares of the Fund will continue to be met. The Exchange may, but is not required to, remove the shares of the Fund from listing if, among other things: (i) following the initial 12-month period beginning upon the commencement of trading of Fund shares, there are fewer than 50 record and/or beneficial owners of shares of the Fund for 30 or more consecutive trading days, or (ii) any other event shall occur or condition shall exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will also remove shares of the Fund from listing and trading upon termination of the Fund.

As in the case of other publicly-traded securities, when you buy or sell shares of the Fund through a broker, you may incur a brokerage commission determined by that broker, as well as other charges.

TYPES OF INVESTMENTS

The investment objective of the Fund and the descriptions of the Fund's principal investment strategies are set forth under "Investment Objective," "Principal Investment Strategies", and "Principal Investment Risks" in the Prospectus. The Fund's investment objective is not fundamental and may be changed without the approval of a majority of the outstanding voting securities of the Fund.

The following pages contain more detailed information about the types of instruments in which the Fund may invest directly or through (i) open-end investment companies (mutual funds), (ii) closed-end funds, (iii) exchange-traded funds ("ETFs"), (iv) limited partnerships, (v) limited liability companies and (vi) other types of pooled investment vehicles (collectively, "Underlying Funds") and strategies Toews Corporation (the "Adviser") employs in pursuit of the Fund's investment objective and a summary of related risks.

Equity Securities

Equity securities include common stocks, preferred stocks and securities convertible into common stocks, such as convertible bonds, warrants, rights and options. The value of equity securities varies in response to many factors, including the activities and financial condition of individual companies, the business market in which individual companies compete and general market and economic conditions. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be significant.

Securities of Other Investment Companies

Investments in ETFs involve certain additional expenses and certain tax results, which would not be present in a direct investment in such funds. Due to legal limitations, the Fund will be prevented from: 1) purchasing more than 3% of an investment company's (including ETFs) outstanding shares; 2) investing more than 5% of the Fund's assets in any single such investment company, and 3) investing more than 10% of the Fund's assets in investment companies overall; unless: (i) the underlying investment company and/or the Fund has received an order for exemptive relief from such limitations from the Securities and Exchange Commission ("SEC"); and (ii) the underlying investment company and the Fund take appropriate steps to comply with any conditions in such order. In the alternative, the Fund may rely on Rule 12d1-3, which allows unaffiliated mutual funds to exceed the 5% limitation and the 10% limitation, provided the aggregate sales loads any investor pays (i.e., the combined distribution expenses of both the acquiring fund and the acquired fund) does not exceed the limits on sales loads established by Financial Industry Regulatory Authority ("FINRA") for funds of funds. In addition to ETFs, the Fund may invest in other investment companies such as open-end mutual funds or exchange-traded funds, within the limitations described above. Each investment company is subject to specific risks, depending on the nature of the fund. ETFs and mutual funds may employ leverage, which magnifies the changes in the underlying stock or other index upon which they are based.

Exchange Traded Funds

ETFs are generally passive funds that track their related index and have the flexibility of trading like a security. They are managed by professionals and typically provide the investor with diversification, cost and tax efficiency, liquidity, marginability, are useful for hedging, have the ability to go long and short, and some provide quarterly dividends. Additionally, some ETFs are unit

investment trusts ("UITs"). Under certain circumstances, the adviser may invest in ETFs, known as "inverse funds," which are designed to produce results opposite to market trends. Inverse ETFs are funds designed to rise in price when stock prices are falling.

ETFs typically have two markets. The primary market is where institutions swap "creation units" in block-multiples of, for example, 50,000 shares for in-kind securities and cash in the form of dividends. The secondary market is where individual investors can trade as little as a single share during trading hours on the exchange. This is different from open-ended mutual funds that are traded after hours once the net asset value ("NAV") is calculated. ETFs share many similar risks with open-end and closed-end funds.

Foreign Securities

General

Investing in securities of foreign companies and countries involves certain considerations and risks that are not typically associated with investing in U.S. government securities and securities of domestic companies. There may be less publicly available information about a foreign issuer than a domestic one, and foreign companies are not generally subject to uniform accounting, auditing and financial standards and requirements comparable to those applicable to U.S. companies. There may also be less government supervision and regulation of foreign securities exchanges, brokers and listed companies than exists in the United States. Interest and dividends paid by foreign issuers may be subject to withholding and other foreign taxes, which may decrease the net return on such investments as compared to dividends and interest paid to the Fund by domestic companies or the U.S. government. There may be the possibility of expropriations, seizure or nationalization of foreign deposits, confiscatory taxation, political, economic or social instability or diplomatic developments that could affect assets of the Fund held in foreign countries. Finally, the establishment of exchange controls or other foreign governmental laws or restrictions could adversely affect the payment of obligations.

To the extent currency exchange transactions do not fully protect the Fund against adverse changes in currency exchange rates, decreases in the value of currencies of the foreign countries in which the Fund will invest relative to the U.S. dollar will result in a corresponding decrease in the U.S. dollar value of the Fund's assets denominated in those currencies (and possibly a corresponding increase in the amount of securities required to be liquidated to meet distribution requirements). Conversely, increases in the value of currencies of the foreign countries in which the Fund invests relative to the U.S. dollar will result in a corresponding increase in the U.S. dollar value of the Fund's assets (and possibly a corresponding decrease in the amount of securities to be liquidated).

Emerging Markets Securities

Investing in emerging market securities imposes risks different from, or greater than, risks of investing in foreign developed countries. These risks include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; possible repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales; future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to

investments in these currencies by the Fund. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Additional risks of emerging markets securities may include: greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed legal systems. In addition, emerging securities markets may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions. Settlement problems may cause the Fund to miss attractive investment opportunities, hold a portion of its assets in cash pending investment, or be delayed in disposing of a portfolio security. Such a delay could result in possible liability to a purchaser of the security.

Securities Options

The Fund may purchase and write (*i.e.*, sell) put and call options. Such options may relate to particular securities or stock indices, and may or may not be listed on a domestic or foreign securities exchange and may or may not be issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves.

A call option for a particular security gives the purchaser of the option the right to buy, and the writer (seller) the obligation to sell, the underlying security at the stated exercise price at any time prior to the expiration of the option, regardless of the market price of the security. The premium paid to the writer is in consideration for undertaking the obligation under the option contract. A put option for a particular security gives the purchaser the right to sell the security at the stated exercise price at any time prior to the expiration date of the option, regardless of the market price of the security.

Stock index options are put options and call options on various stock indices. In most respects, they are identical to listed options on common stocks. The primary difference between stock options and index options occurs when index options are exercised. In the case of stock options, the underlying security, common stock, is delivered. However, upon the exercise of an index option, settlement does not occur by delivery of the securities comprising the index. The option holder who exercises the index option receives an amount of cash if the closing level of the stock index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the stock index and the exercise price of the option expressed in dollars times a specified multiple. A stock index fluctuates with changes in the market value of the stocks included in the index. For example, some stock index options are based on a broad market index, such as the Standard & Poor's 500® Index or the Value Line Composite Index or a narrower market index, such as the Standard & Poor's 100®. Indices may also be based on an industry or market segment, such as the NYSE Arca Oil and Gas Index or the Computer and Business Equipment Index. Options on stock indices are currently traded on the Chicago Board Options Exchange, the New York Stock Exchange and the NASDAQ PHLX.

The Fund's obligation to sell an instrument subject to a call option written by it, or to purchase an instrument subject to a put option written by it, may be terminated prior to the expiration date of the option by the Fund's execution of a closing purchase transaction, which is effected by purchasing on an exchange an option of the same series (*i.e.*, same underlying instrument, exercise price and expiration date) as the option previously written. A closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying instrument from being called, to permit the sale of the underlying instrument or to permit the writing of a new option containing different terms on such underlying instrument. The cost of such a liquidation purchase plus transactions costs may be greater than the premium received upon the original option, in which event the Fund will have paid a loss in the transaction. There is no assurance that a liquid secondary market will exist for any particular option. An option writer unable to effect a closing purchase transaction will not be able to sell the underlying instrument or liquidate the assets held in a segregated account, as described below, until the option expires or the optioned instrument is delivered upon exercise. In such circumstances, the writer will be subject to the risk of market decline or appreciation in the instrument during such period.

If an option purchased by the Fund expires unexercised, the Fund realizes a loss equal to the premium paid. If the Fund enters into a closing sale transaction on an option purchased by it, the Fund will realize a gain if the premium received by the Fund on the closing transaction is more than the premium paid to purchase the option, or a loss if it is less. If an option written by the Fund expires on the stipulated expiration date or if the Fund enters into a closing purchase transaction, it will realize a gain (or loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold). If an option written by the Fund is exercised, the proceeds of the sale will be increased by the net premium originally received and the Fund will realize a gain or loss.

Certain Risks Regarding Options

There are several risks associated with transactions in options. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. In addition, a liquid secondary market for particular options, whether traded over-the-counter or on an exchange, may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities or currencies; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle current trading value; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Successful use by the Fund of options on stock indices will be subject to the ability of the Adviser to correctly predict movements in the directions of the stock market. This requires different skills and techniques than predicting changes in the prices of individual securities. In addition, the Fund's ability to effectively hedge all or a portion of the securities in its portfolio, in anticipation of or during a market decline, through transactions in put options on stock indices, depends on the degree to which price movements in the underlying index correlate with the price movements of the securities held by the Fund. Inasmuch as the Fund's securities will not duplicate the components of an index,

the correlation will not be perfect. Consequently, the Fund bears the risk that the prices of its securities being hedged will not move in the same amount as the prices of its put options on the stock indices. It is also possible that there may be a negative correlation between the index and the Fund's securities that would result in a loss on both such securities and the options on stock indices acquired by the Fund.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. The purchase of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The purchase of stock index options involves the risk that the premium and transaction costs paid by the Fund in purchasing an option will be lost as a result of unanticipated movements in prices of the securities comprising the stock index on which the option is based.

There is no assurance that a liquid secondary market on an options exchange will exist for any particular option, or at any particular time, and for some options no secondary market on an exchange or elsewhere may exist. If the Fund is unable to close out a call option on securities that it has written before the option is exercised, the Fund may be required to purchase the optioned securities in order to satisfy its obligation under the option to deliver such securities. If the Fund is unable to effect a closing sale transaction with respect to options on securities that it has purchased, it would have to exercise the option in order to realize any profit and would incur transaction costs upon the purchase and sale of the underlying securities.

Cover for Options Positions

Transactions using options (other than options that the Fund has purchased) expose the Fund to an obligation to another party. The Fund will not enter into any such transactions unless it owns either (i) an offsetting ("covered") position in securities or other options or (ii) cash or liquid securities with a value sufficient at all times to cover its potential obligations not covered as provided in (i) above. The Fund will comply with SEC guidelines regarding cover for these instruments and, if the guidelines so require, set aside cash or liquid securities in a segregated account with the Fund's custodian in the prescribed amount. Under current SEC guidelines, the Fund will segregate assets to cover transactions in which the Fund writes or sells options.

Assets used as cover or held in a segregated account cannot be sold while the position in the corresponding option is open, unless they are replaced with similar assets. As a result, the commitment of a large portion of the Fund's assets to cover or segregated accounts could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations.

Options on Futures Contracts

The Fund may purchase and sell options on the same types of futures in which it may invest. Options on futures are similar to options on underlying instruments except that options on futures give the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put), rather than to purchase or sell the futures contract, at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by the delivery of the accumulated balance in the writer's

futures margin account which represents the amount by which the market price of the futures contract, at exercise, exceeds (in the case of a call) or is less than (in the case of a put) the exercise price of the option on the futures contract. Purchasers of options who fail to exercise their options prior to the exercise date suffer a loss of the premium paid.

Common Stock

Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

Preferred Stock

Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates.

The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income securities and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth.

Dealer Options

The Fund may engage in transactions involving dealer options as well as exchange-traded options. Certain additional risks are specific to dealer options. While the Fund might look to a clearing corporation to exercise exchange-traded options, if the Fund were to purchase a dealer option it would need to rely on the dealer from which it purchased the option to perform if the option were exercised. Failure by the dealer to do so would result in the loss of the premium paid by the Fund as well as loss of the expected benefit of the transaction.

Exchange-traded options generally have a continuous liquid market while dealer options may not. Consequently, the Fund may generally be able to realize the value of a dealer option it has purchased only by exercising or reselling the option to the dealer who issued it. Similarly, when the Fund writes a dealer option, it may generally be able to close out the option prior to its expiration only by entering into a closing purchase transaction with the dealer to whom the Fund originally wrote the option. While the Fund will seek to enter into dealer options only with dealers who will agree to and which are expected to be capable of entering into closing transactions with the Fund, there can be no assurance that the Fund will at any time be able to liquidate a dealer option at a favorable price at any time prior to expiration. Unless the Fund, as a covered dealer call option writer, is able to effect a closing purchase transaction, it will not be able to liquidate securities (or other assets) used as cover until the option expires or is exercised. In the event of insolvency of the other party, the Fund may be unable to liquidate a dealer option. With respect to options written by the Fund, the inability to enter

into a closing transaction may result in material losses to the Fund. For example, because the Fund must maintain a secured position with respect to any call option on a security it writes, the Fund may not sell the assets, which it has segregated to secure the position while it is obligated under the option. This requirement may impair the Fund's ability to sell portfolio securities at a time when such sale might be advantageous.

The Staff of the SEC has taken the position that purchased dealer options are illiquid securities. The Fund may treat the cover used for written dealer options as liquid if the dealer agrees that the Fund may repurchase the dealer option it has written for a maximum price to be calculated by a predetermined formula. In such cases, the dealer option would be considered illiquid only to the extent the maximum purchase price under the formula exceeds the intrinsic value of the option. Accordingly, the Fund will treat dealer options as subject to the Fund's limitation on illiquid securities. If the SEC changes its position on the liquidity of dealer options, the Fund will change its treatment of such instruments accordingly.

Convertible Securities

Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. Convertible securities are senior to common stocks in an issuer's capital structure, but are usually subordinated to similar non-convertible securities. While providing a fixed-income stream (generally higher in yield than the income derivable from common stock but lower than that afforded by a similar nonconvertible security), a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock.

Real Estate Investment Trusts

The Fund may invest in securities of real estate investment trusts ("REITs"). REITs are publicly traded corporations or trusts that specialize in acquiring, holding and managing residential, commercial or industrial real estate. A REIT is not taxed at the entity level on income distributed to its shareholders or unitholders if it distributes to shareholders or unitholders at least 95% of its taxable income for each taxable year and complies with regulatory requirements relating to its organization, ownership, assets and income.

REITs generally can be classified as "Equity REITs", "Mortgage REITs" and "Hybrid REITs." An Equity REIT invests the majority of its assets directly in real property and derives its income primarily from rents and from capital gains on real estate appreciation, which are realized through property sales. A Mortgage REIT invests the majority of its assets in real estate mortgage loans and services its income primarily from interest payments. A Hybrid REIT combines the characteristics of an Equity REIT and a Mortgage REIT. Although the Fund can invest in all three kinds of REITs, its emphasis is expected to be on investments in Equity REITs.

Investments in the real estate industry involve particular risks. The real estate industry has been subject to substantial fluctuations and declines on a local, regional and national basis in the past and may continue to be in the future. Real property values and income from real property continue to

be in the future. Real property values and income from real property may decline due to general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, regulatory limitations on rents, changes in neighborhoods and in demographics, increases in market interest rates, or other factors. Factors such as these may adversely affect companies that own and operate real estate directly, companies that lend to such companies, and companies that service the real estate industry.

Investments in REITs also involve risks. Equity REITs will be affected by changes in the values of and income from the properties they own, while Mortgage REITs may be affected by the credit quality of the mortgage loans they hold. In addition, REITs are dependent on specialized management skills and on their ability to generate cash flow for operating purposes and to make distributions to shareholders or unitholders REITs may have limited diversification and are subject to risks associated with obtaining financing for real property, as well as to the risk of self-liquidation. REITs also can be adversely affected by their failure to qualify for tax-free pass-through treatment of their income under the Internal Revenue Code of 1986, as amended, or their failure to maintain an exemption from registration under the 1940 Act. By investing in REITs indirectly through the Fund, a shareholder bears not only a proportionate share of the expenses of the Fund, but also may indirectly bear similar expenses of some of the REITs in which it invests.

Short Sales

The Fund may sell securities short as an outright investment strategy and to offset potential declines in long positions in similar securities. A short sale is a transaction in which the Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline.

When the Fund makes a short sale, the broker-dealer through which the short sale is made must borrow the security sold short and deliver it to the party purchasing the security. The Fund is required to make a margin deposit in connection with such short sales; the Fund may have to pay a fee to borrow particular securities and will often be obligated to pay over any dividends and accrued interest on borrowed securities.

If the price of the security sold short increases between the time of the short sale and the time the Fund covers its short position, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. The successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged.

To the extent the Fund sells securities short, it will provide collateral to the broker-dealer and (except in the case of short sales "against the box") will maintain additional asset coverage in the form of cash, U.S. government securities or other liquid securities with its custodian in a segregated account in an amount at least equal to the difference between the current market value of the securities sold short and any amounts required to be deposited as collateral with the selling broker. A short sale is "against the box" to the extent the Fund contemporaneously owns, or has the right to obtain at no added cost, securities identical to those sold short.

Warrants

Warrants are options to purchase common stock at a specific price (usually at a premium above the market value of the optioned common stock at issuance) valid for a specific period of time. Warrants may have a life ranging from less than one year to twenty years, or they may be perpetual. However, most warrants have expiration dates after which they are worthless. In addition, a warrant is worthless if the market price of the common stock does not exceed the warrant's exercise price during the life of the warrant. Warrants have no voting rights, pay no dividends, and have no rights with respect to the assets of the corporation issuing them. The percentage increase or decrease in the market price of the warrant may tend to be greater than the percentage increase or decrease in the market price of the optioned common stock.

Spread Transactions

The Fund may purchase covered spread options from securities dealers. These covered spread options are not presently exchange-listed or exchange-traded. The purchase of a spread option gives the Fund the right to put securities that it owns at a fixed dollar spread or fixed yield spread in relationship to another security that the Fund does not own, but which is used as a benchmark. The risk to the Fund, in addition to the risks of dealer options described above, is the cost of the premium paid as well as any transaction costs. The purchase of spread options will be used to protect the Fund against adverse changes in prevailing credit quality spreads, *i.e.*, the yield spread between high quality and lower quality securities. This protection is provided only during the life of the spread options.

Depositary Receipts

Sponsored and unsponsored American Depositary Receipts ("ADRs") are receipts issued by an American bank or trust company evidencing ownership of underlying securities issued by a foreign issuer. ADRs, in registered form, are designed for use in U.S. securities markets. Unsponsored ADRs may be created without the participation of the foreign issuer. Holders of these ADRs generally bear all the costs of the ADR facility, whereas foreign issuers typically bear certain costs in a sponsored ADR. The bank or trust company depositary of an unsponsored ADR may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Many of the risks described below regarding foreign securities apply to investments in ADRs.

Certificates of Deposit and Bankers' Acceptances

Certificates of deposit are receipts issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the bearer of the receipt on the date specified on the certificate. The certificate usually can be traded in the secondary market prior to maturity. Bankers' acceptances typically arise from short-term credit arrangements designed to enable businesses to obtain funds to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an earning asset, or it may be sold in the secondary market at the going rate of discount for a specific maturity. Although maturities for acceptances can be as long as 270 days, most acceptances have maturities of six months or less.

Commercial Paper

Commercial paper consists of short-term (usually from 1 to 270 days) unsecured promissory notes issued by corporations in order to finance their current operations. It may be secured by letters of credit, a surety bond or other forms of collateral. Commercial paper is usually repaid at maturity by the issuer from the proceeds of the issuance of new commercial paper. As a result, investment in commercial paper is subject to the risk the issuer cannot issue enough new commercial paper to satisfy its outstanding commercial paper, also known as rollover risk. Commercial paper may become illiquid or may suffer from reduced liquidity in certain circumstances. Like all fixed income securities, commercial paper prices are susceptible to fluctuations in interest rates. If interest rates rise, commercial paper prices will decline. The short-term nature of a commercial paper investment makes it less susceptible to interest rate risk than many other fixed income securities because interest rate risk typically increases as maturity lengths increase. Commercial paper tends to yield smaller returns than longer-term corporate debt because securities with shorter maturities typically have lower effective yields than those with longer maturities. As with all fixed income securities, there is a chance that the issuer will default on its commercial paper obligation.

Information on Time Deposits and Variable Rate Notes

Time deposits are issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the depositor on the date specified with respect to the deposit. Time deposits do not trade in the secondary market prior to maturity. However, some time deposits may be redeemable prior to maturity and may be subject to withdrawal penalties.

The commercial paper obligations are typically unsecured and may include variable rate notes. The nature and terms of a variable rate note (i.e., a "Master Note") permit the Fund to invest fluctuating amounts at varying rates of interest pursuant to a direct arrangement between the Fund and the issuer. It permits daily changes in the amounts invested. The Fund, typically, has the right at any time to increase, up to the full amount stated in the note agreement, or to decrease the amount outstanding under the note. The issuer may prepay at any time and without penalty any part of or the full amount of the note. The note may or may not be backed by one or more bank letters of credit. Because these notes are direct investment arrangements between the Fund and the issuer, it is not generally contemplated that they will be traded; moreover, there is currently no secondary market for them. Except as specifically provided in the Prospectus, there is no limitation on the type of issuer from whom these notes may be purchased; however, in connection with such purchase and on an ongoing basis, the Adviser will consider the earning power, cash flow and other liquidity ratios of the issuer, and its ability to pay principal and interest on demand, including a situation in which all holders of such notes made demand simultaneously. Variable rate notes are subject to the Fund's investment restriction on illiquid securities unless such notes can be put back to the issuer (redeemed) on demand within seven days.

Insured Bank Obligations

The Federal Deposit Insurance Corporation ("FDIC") insures the deposits of federally insured banks and savings and loan associations (collectively referred to as "banks") up to \$250,000. The Fund may elect to purchase bank obligations in small amounts so as to be fully insured as to principal by the FDIC. Currently, to remain fully insured as to principal, these investments must be limited to \$250,000 per bank; if the principal amount and accrued interest together exceed \$250,000, the

excess principal and accrued interest will not be insured. Insured bank obligations may have limited marketability.

Securities of Other Investment Companies

Investments in mutual funds involve certain additional expenses and certain tax results, which would not be present in a direct investment in such funds. Due to legal limitations, the Fund will be prevented from: 1) purchasing more than 3% of an investment company's outstanding shares; 2) investing more than 5% of the Fund's assets in any single such investment company, and 3) investing more than 10% of the Fund's assets in investment companies overall; unless: (i) the underlying investment company and/or the Fund has received an order for exemptive relief from such limitations from the Securities and Exchange Commission ("SEC"); and (ii) the underlying investment company and the Fund take appropriate steps to comply with any conditions in such order. In the alternative, the Fund may rely on Rule 12d1-3, which allows unaffiliated mutual funds to exceed the 5% limitation and the 10% limitation, provided the aggregate sales loads any investor pays (i.e., the combined distribution expenses of both the acquiring fund and the acquired fund) does not exceed the limits on sales loads established by Financial Industry Regulatory Authority ("FINRA") for funds of funds. In addition to ETFs, the Fund may invest in other investment companies such as open-end mutual funds or exchange-traded funds, within the limitations described above. Each investment company is subject to specific risks, depending on the nature of the fund. Mutual funds may employ leverage, which magnifies the changes in the underlying stock or other index upon which they are based.

Open-End Investment Companies

The Fund and any "affiliated persons," as defined by the 1940 Act, may purchase in the aggregate only up to 3% of the total outstanding securities of any underlying fund. Accordingly, when affiliated persons hold shares of any of the underlying fund, the Fund's ability to invest fully in shares of those funds is restricted, and the Adviser must then, in some instances, select alternative investments that would not have been its first preference. The 1940 Act also provides that an underlying fund whose shares are purchased by the Fund will be obligated to redeem shares held by the Fund only in an amount up to 1% of the underlying Fund's outstanding securities during any period of less than 30 days. Shares held by the Fund in excess of 1% of an underlying Fund's outstanding securities therefore, will be considered not readily marketable securities, which, together with other such securities, may not exceed 15% of the Fund's total assets.

Under certain circumstances an underlying fund may determine to make payment of a redemption by the Fund wholly or partly by a distribution in kind of securities from its portfolio, in lieu of cash, in conformity with the rules of the SEC. In such cases, the Fund may hold securities distributed by an underlying fund until the Adviser determines that it is appropriate to dispose of such securities.

Investment decisions by the investment advisers of the underlying fund(s) are made independently of the Fund and the Adviser. Therefore, the investment adviser of one underlying fund may be purchasing shares of the same issuer whose shares are being sold by the investment adviser of another such fund. The result would be an indirect expense to the Fund without accomplishing any investment purpose.

Closed-End Investment Companies

The Fund may invest its assets in "closed-end" investment companies (or "closed-end funds"), subject to the investment restrictions set forth above. Shares of closed-end funds are typically offered to the public in a one-time initial public offering by a group of underwriters who retain a spread or underwriting commission of between 4% or 6% of the initial public offering price. Such securities are then listed for trading on the New York Stock Exchange, the National Association of Securities Dealers Automated Quotation System (commonly known as "NASDAQ") or, in some cases, may be traded in other over-the-counter markets. Because the shares of closed-end funds cannot be redeemed upon demand to the issuer like the shares of an open-end investment company (such as the Fund), investors seek to buy and sell shares of closed-end funds in the secondary market.

The Fund generally will purchase shares of closed-end funds only in the secondary market. A Fund will incur normal brokerage costs on such purchases similar to the expenses the Fund would incur for the purchase of securities of any other type of issuer in the secondary market. A Fund may, however, also purchase securities of a closed-end fund in an initial public offering when, in the opinion of the Adviser, based on a consideration of the nature of the closed-end Fund's proposed investments, the prevailing market conditions and the level of demand for such securities, they represent an attractive opportunity for growth of capital. The initial offering price typically will include a dealer spread, which may be higher than the applicable brokerage cost if the Fund purchased such securities in the secondary market.

The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share, which is less than the net asset value per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined net asset value but rather are subject to the principles of supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their net asset value.

The Fund may invest in shares of closed-end funds that are trading at a discount to net asset value or at a premium to net asset value. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the net asset value of the Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end Fund's common shares in an attempt to enhance the current return to such closed-end Fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and net asset value than an investment in shares of investment companies without a leveraged capital structure.

United States Government Obligations

These consist of various types of marketable securities issued by the United States Treasury, i.e., bills, notes and bonds. Such securities are direct obligations of the United States government and differ mainly in the length of their maturity. Treasury bills, the most frequently issued marketable government security, have a maturity of up to one year and are issued on a discount basis.

United States Government Agencies

These consist of debt securities issued by agencies and instrumentalities of the United States government, including the various types of instruments currently outstanding or which may be offered in the future. Agencies include, among others, the Federal Housing Administration, Government National Mortgage Association ("Ginnie Mae"), Farmer's Home Administration, Export-Import Bank of the United States, Maritime Administration, and General Services Administration. Instrumentalities include, for example, each of the Federal Home Loan Banks, the National Bank for Cooperatives, the Federal Home Loan Mortgage Corporation ("Freddie Mac"), the Farm Credit Banks, the Federal National Mortgage Association ("Fannie Mae"), and the United States Postal Service. These securities are either: (i) backed by the full faith and credit of the United States government (e.g., United States Treasury Bills); (ii) guaranteed by the United States Treasury (e.g., Ginnie Mae mortgage-backed securities); (iii) supported by the issuing agency's or instrumentality's right to borrow from the United States Treasury (e.g., Fannie Mae Discount Notes); or (iv) supported only by the issuing agency's or instrumentality's own credit (e.g., Tennessee Valley Association).

Government-related guarantors (i.e. not backed by the full faith and credit of the United States Government) include Fannie Mae and Freddie Mac. Fannie Mae is a government-sponsored corporation owned entirely by private stockholders. It is subject to general regulation by the Secretary of Housing and Urban Development. Fannie Mae purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by Fannie Mae are guaranteed as to timely payment of principal and interest by Fannie Mae but are not backed by the full faith and credit of the United States Government.

Freddie Mac was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a government-sponsored corporation formerly owned by the twelve Federal Home Loan Banks and now owned entirely by private stockholders. Freddie Mac issues PCs, which represent interests in conventional mortgages from Freddie Mac's national portfolio. Freddie Mac guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the United States Government. Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may, in addition, be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage-related securities. Pools created by such nongovernmental issuers generally offer a higher rate of interest than government and government-related pools because there are no direct or indirect government or agency guarantees of payments in the former pools. However, timely payment of interest and principal of these pools may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit. The insurance and guarantees are issued by governmental entities, private insurers and the mortgage poolers.

On September 7, 2008, the U.S. Treasury Department and the Federal Housing Finance Authority (the "FHFA") announced that Fannie Mae and Freddie Mac had been placed into conservatorship, a statutory process designed to stabilize a troubled institution with the objective of returning the entity to normal business operations. The U.S. Treasury Department and the FHFA at the same time established a secured lending facility and a Secured Stock Purchase Agreement with both Fannie Mae and Freddie Mac to ensure that each entity had the ability to fulfill its financial obligations. The FHFA announced that it does not anticipate any disruption in pattern of payments or ongoing business operations of Fannie Mae or Freddie Mac.

Credit Default Swaps

Credit Default Swaps. Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In the case of a credit default swap ("CDS"), the contract gives one party (the buyer) the right to recoup the economic value of a decline in the value of debt securities of the reference issuer if the credit event (a downgrade or default) occurs. This value is obtained by delivering a debt security of the reference issuer to the party in return for a previously agreed payment from the other party (frequently, the par value of the debt security). CDS include credit default swaps, which are contracts on individual securities, and CDX, which are contracts on baskets or indices of securities.

Credit default swaps may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the default of a reference obligation. The Fund will earmark and reserve assets, in cash or liquid securities, to cover any accrued payment obligations when it is the buyer of a CDS. In cases where a Fund is a seller of a CDS contract, the Fund will earmark and reserve assets, in cash or liquid securities, to cover its obligation (for credit default swaps on individual securities, such amount will be the notional amount of the CDS).

If the Fund is a seller of protection under a CDS contract, the Fund would be required to pay the par (or other agreed upon) value of a referenced debt obligation to the counterparty in the event of a default or other credit event by the reference issuer, such as a U.S. or foreign corporate issuer, with respect to such debt obligations. In return, the Fund would receive from the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would keep the stream of payments and would have no payment obligations. As the seller, the Fund would be subject to investment exposure on the notional amount of the swap.

If the Fund is a buyer of protection under a CDS contract, the Fund would have the right to deliver a referenced debt obligation and receive the par (or other agreed-upon) value of such debt obligation from the counterparty in the event of a default or other credit event (such as a downgrade in credit rating) by the reference issuer, such as a U.S. or foreign corporation, with respect to its debt obligations. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the counterparty would keep the stream of payments and would have no further obligations to the Fund.

The use of CDSs, like all swap agreements, is subject to certain risks. If a counterparty's creditworthiness declines, the value of the swap would likely decline. Moreover, there is no guarantee that the Fund could eliminate its exposure under an outstanding swap agreement by entering into an offsetting swap agreement with the same or another party. In addition to general market risks, CDSs

involve liquidity, credit and counterparty risks. The recent increase in corporate defaults further raises these liquidity and credit risks, increasing the possibility that sellers will not have sufficient funds to make payments. As unregulated instruments, CDSs are difficult to value and are therefore susceptible to liquidity and credit risks. Counterparty risks also stem from the lack of regulation of CDSs. Collateral posting requirements are individually negotiated between counterparties and there is no regulatory requirement concerning the amount of collateral that a counterparty must post to secure its obligations under a CDS. Because they are unregulated, there is no requirement that parties to a contract be informed in advance when a CDS is sold. As a result, investors may have difficulty identifying the party responsible for payment of their claims.

If a counterparty's credit becomes significantly impaired, multiple requests for collateral posting in a short period of time could increase the risk that the Fund may not receive adequate collateral. There is no readily available market for trading out of CDS contracts. In order to eliminate a position it has taken in a CDS, the Fund must terminate the existing CDS contract or enter into an offsetting trade. The Fund may only exit its obligations under a CDS contract by terminating the contract and paying applicable breakage fees, which could result in additional losses to the Fund. Furthermore, the cost of entering into an offsetting CDS position could cause the Fund to incur losses.

Repurchase Agreements

The Fund may enter into repurchase agreements. In a repurchase agreement, an investor (such as the Fund) purchases a security (known as the "underlying security") from a securities dealer or bank. Any such dealer or bank must be deemed creditworthy by the Adviser. At that time, the bank or securities dealer agrees to repurchase the underlying security at a mutually agreed upon price on a designated future date. The repurchase price may be higher than the purchase price, the difference being income to the Fund, or the purchase and repurchase prices may be the same, with interest at an agreed upon rate due to the Fund on repurchase. In either case, the income to the Fund generally will be unrelated to the interest rate on the underlying securities. Repurchase agreements must be "fully collateralized," in that the market value of the underlying securities (including accrued interest) must at all times be equal to or greater than the repurchase price. Therefore, a repurchase agreement can be considered a loan collateralized by the underlying securities.

Repurchase agreements are generally for a short period of time, often less than a week, and will generally be used by the Fund to invest excess cash or as part of a temporary defensive strategy. Repurchase agreements that do not provide for payment within seven days will be treated as illiquid securities. In the event of a bankruptcy or other default by the seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying security and losses. These losses could result from: (a) possible decline in the value of the underlying security while the Fund is seeking to enforce its rights under the repurchase agreement; (b) possible reduced levels of income or lack of access to income during this period; and (c) expenses of enforcing its rights.

Trading in Futures Contracts

A futures contract provides for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument (e.g., units of a stock index) for a specified price, date, time and place designated at the time the contract is made. Brokerage fees are paid when a futures contract is bought or sold and margin deposits must be maintained. Entering into a contract

to buy is commonly referred to as buying or purchasing a contract or holding a long position. Entering into a contract to sell is commonly referred to as selling a contract or holding a short position.

Unlike when the Fund purchases or sells a security, no price would be paid or received by the Fund upon the purchase or sale of a futures contract. Upon entering into a futures contract, and to maintain the Fund's open positions in futures contracts, the Fund would be required to deposit with its custodian or futures broker in a segregated account in the name of the futures broker an amount of cash, U.S. government securities, suitable money market instruments, or other liquid securities, known as "initial margin." The margin required for a particular futures contract is set by the exchange on which the contract is traded, and may be significantly modified from time to time by the exchange during the term of the contract. Futures contracts are customarily purchased and sold on margins that may range upward from less than 5% of the value of the contract being traded.

If the price of an open futures contract changes (by increase in underlying instrument or index in the case of a sale or by decrease in the case of a purchase) so that the loss on the futures contract reaches a point at which the margin on deposit does not satisfy margin requirements, the broker will require an increase in the margin. However, if the value of a position increases because of favorable price changes in the futures contract so that the margin deposit exceeds the required margin, the broker will pay the excess to the Fund.

These subsequent payments, called "variation margin," to and from the futures broker, are made on a daily basis as the price of the underlying assets fluctuate making the long and short positions in the futures contract more or less valuable, a process known as "marking to the market." The Fund expect to earn interest income on margin deposits.

Although certain futures contracts, by their terms, require actual future delivery of and payment for the underlying instruments, in practice most futures contracts are usually closed out before the delivery date. Closing out an open futures contract purchase or sale is effected by entering into an offsetting futures contract sale or purchase, respectively, for the same aggregate amount of the identical underlying instrument or index and the same delivery date. If the offsetting purchase price is less than the original sale price, the Fund realizes a gain; if it is more, the Fund realizes a loss. Conversely, if the offsetting sale price is more than the original purchase price, the Fund realizes a gain; if it is less, the Fund realizes a loss. The transaction costs must also be included in these calculations. There can be no assurance, however, that the Fund will be able to enter into an offsetting transaction with respect to a particular futures contract at a particular time. If the Fund is not able to enter into an offsetting transaction, the Fund will continue to be required to maintain the margin deposits on the futures contract.

For example, one contract in the Financial Times Stock Exchange 100 Index future is a contract to buy 25 pounds sterling multiplied by the level of the UK Financial Times 100 Share Index on a given future date. Settlement of a stock index futures contract may or may not be in the underlying instrument or index. If not in the underlying instrument or index, then settlement will be made in cash, equivalent over time to the difference between the contract price and the actual price of the underlying asset at the time the stock index futures contract expires.

Regulation as a Commodity Pool Operator

The Adviser, on behalf of the Fund, has filed with the National Futures Association, a notice claiming an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act, as amended, and the rules of the Commodity Futures Trading Commission

promulgated thereunder, with respect to the Fund's operation. Accordingly, the Fund is not subject to registration or regulation as a commodity pool operator.

When-Issued, Forward Commitments and Delayed Settlements

The Fund may purchase and sell securities on a when-issued, forward commitment or delayed settlement basis. In this event, the Custodian (as defined under the section entitled "Custodian") will segregate liquid assets equal to the amount of the commitment in a separate account. Normally, the Custodian will set aside portfolio securities to satisfy a purchase commitment. In such a case, the Fund may be required subsequently to segregate additional assets in order to assure that the value of the account remains equal to the amount of the Fund's commitment. It may be expected that the Fund's net assets will fluctuate to a greater degree when it sets aside portfolio securities to cover such purchase commitments than when it sets aside cash.

The Fund does not intend to engage in these transactions for speculative purposes but only in furtherance of its investment objectives. Because the Fund will segregate liquid assets to satisfy purchase commitments in the manner described, the Fund's liquidity and the ability of the Adviser to manage them may be affected in the event the Fund's forward commitments, commitments to purchase when-issued securities and delayed settlements ever exceeded 15% of the value of its net assets.

The Fund will purchase securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, the Fund may dispose of or renegotiate a commitment after it is entered into, and may sell securities it has committed to purchase before those securities are delivered to the Fund on the settlement date. In these cases, the Fund may realize a taxable capital gain or loss. When the Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in the Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of the Fund starting on the day the Fund agrees to purchase the securities. The Fund does not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

Illiquid and Restricted Securities

The Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities include securities subject to contractual or legal restrictions on resale (e.g., because they have not been registered under the Securities Act of 1933, as amended (the "Securities Act")) and securities that are otherwise not readily marketable (e.g., because trading in the security is suspended or because market makers do not exist or will not entertain bids or offers). Securities that have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. Foreign securities that are freely tradable in their principal markets are not considered to be illiquid.

Restricted and other illiquid securities may be subject to the potential for delays on resale and uncertainty in valuation. The Fund might be unable to dispose of illiquid securities promptly or at

reasonable prices and might thereby experience difficulty in satisfying redemption requests from shareholders. The Fund might have to register restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

A large institutional market exists for certain securities that are not registered under the Securities Act, including foreign securities. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. Rule 144A under the Securities Act allows such a broader institutional trading market for securities otherwise subject to restrictions on resale to the general public. Rule 144A establishes a "safe harbor" from the registration requirements of the Securities Act for resale of certain securities to qualified institutional buyers. Rule 144A has produced enhanced liquidity for many restricted securities, and market liquidity for such securities may continue to expand as a result of this regulation and the consequent existence of the PORTAL system, which is an automated system for the trading, clearance and settlement of unregistered securities of domestic and foreign issuers sponsored by NASDAQ.

Under guidelines adopted by the Board, the Adviser may determine that particular Rule 144A securities, and commercial paper issued in reliance on the private placement exemption from registration afforded by Section 4(a)(2) of the Securities Act, are liquid even though they are not registered. A determination of whether such a security is liquid or not is a question of fact. In making this determination, the Adviser will consider, as it deems appropriate under the circumstances and among other factors: (1) the frequency of trades and quotes for the security; (2) the number of dealers willing to purchase or sell the security; (3) the number of other potential purchasers of the security; (4) dealer undertakings to make a market in the security; (5) the nature of the security (e.g., debt or equity, date of maturity, terms of dividend or interest payments, and other material terms) and the nature of the marketplace trades (e.g., the time needed to dispose of the security, the method of soliciting offers, and the mechanics of transfer); and (6) the rating of the security and the financial condition and prospects of the issuer. In the case of commercial paper, the Adviser will also determine that the paper (1) is not traded flat or in default as to principal and interest, and (2) is rated in one of the two highest rating categories by at least two National Statistical Rating Organizations ("NRSROs") or, if only one NRSRO rates the security, by that NRSRO, or, if the security is unrated, the Adviser determines that it is of equivalent quality.

Rule 144A securities and Section 4(a)(2) commercial paper that have been deemed liquid as described above will continue to be monitored by the Adviser to determine if the security is no longer liquid as the result of changed conditions. Investing in Rule 144A securities or Section 4(a)(2) commercial paper could have the effect of increasing the amount of the Fund's assets invested in illiquid securities if institutional buyers are unwilling to purchase such securities.

Lending Portfolio Securities

For the purpose of achieving income, the Fund may lend its portfolio securities, provided (1) the loan is secured continuously by collateral consisting of U.S. Government securities or cash or cash equivalents (cash, U.S. Government securities, negotiable certificates of deposit, bankers' acceptances or letters of credit) maintained on a daily mark-to-market basis in an amount at least equal to the current market value of the securities loaned, (2) the Fund may at any time call the loan and obtain the return of securities loaned, (3) the Fund will receive any interest or dividends received on the loaned securities, and (4) the aggregate value of the securities loaned will not at any time exceed one-third of the total assets of the Fund.

INVESTMENT RESTRICTIONS

The Fund has adopted the following investment restrictions that may not be changed without approval by a "majority of the outstanding shares" of the Fund which, as used in this SAI, means the vote of the lesser of (a) 67% or more of the shares of the Fund represented at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (b) more than 50% of the outstanding shares of the Fund. The Fund may not:

1. Issue senior securities, except as otherwise permitted under the 1940 Act, and the rules and regulations promulgated thereunder;

2. Borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions;

3. Purchase securities on margin, participate on a joint or joint and several basis in any securities trading account, or underwrite securities. (Does not preclude the Fund from obtaining such short-term credit as may be necessary for the clearance of purchases and sales of its portfolio securities, and except to the extent that the Fund may be deemed an underwriter under the Securities Act, by virtue of disposing of portfolio securities);

4. Purchase or sell real estate or interests in real estate. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts);

5. Purchase or sell commodities (unless acquired as a result of ownership of securities or other investments) or commodity futures contracts, except that the Fund may purchase and sell futures contracts and options to the full extent permitted under the 1940 Act, sell foreign currency contracts in accordance with any rules of the Commodity Futures Trading Commission, invest in securities or other instruments backed by commodities, and invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities;

6. Make loans to others, except that the Fund may, in accordance with its investment objective and policies, (i) lend portfolio securities, (ii) purchase and hold debt securities or other debt instruments, including but not limited to loan participations and sub-participations, assignments, and structured securities, (iii) make loans secured by mortgages on real property, (iv) enter into repurchase agreements, (v) enter into transactions where each loan is represented by a note executed by the borrower, and (vi) make time deposits with financial institutions and invest in instruments issued by financial institutions. For purposes of this limitation, the term "loans" shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities; or

7. Invest more than 25% of the market value of its assets in the securities of companies engaged in any one industry. (Does not apply to investment in the securities of the U.S. Government, its agencies or instrumentalities.)

The Fund observes the following policies, which are not deemed fundamental and which may be changed without shareholder vote. The Fund may not:

1. Invest in any issuer for purposes of exercising control or management;

2. Invest in securities of other investment companies except as permitted under the 1940 Act;

3. Invest, in the aggregate, more than 15% of its net assets in securities with legal or contractual restrictions on resale, securities, which are not readily marketable and repurchase agreements with more than seven days to maturity. However, if more than 15% of Fund assets (defined as net assets plus the amount of any borrowing for investment purposes) are illiquid, the Fund's investment adviser will reduce illiquid assets such that they do not represent more than 15% of Fund assets, subject to timing and other considerations which are in the best interests of the Fund and its shareholders; or

4. Mortgage, pledge, hypothecate or in any manner transfer, as security for indebtedness, any assets of the Fund except as may be necessary in connection with borrowings described in limitation (1) above. Margin deposits, security interests, liens and collateral arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques are not deemed to be a mortgage, pledge or hypothecation of assets for purposes of this limitation.

5. Purchase any security when outstanding borrowings by the Fund represent more than 5% of its total assets.

If a restriction on the Fund's investments is adhered to at the time an investment is made, a subsequent change in the percentage of Fund assets invested in certain securities or other instruments of the Fund's investment portfolio, resulting from changes in the value of the Fund's total assets, will not be considered a violation of the restriction; provided, however, that the asset coverage requirement applicable to borrowings shall be maintained in the manner contemplated by applicable law.

Although Fundamental Investment Restriction #6 reserves for the Fund the ability to make loans, there is no present intent to loan money and additional disclosure will be provided if such a strategy is implemented in the future.

With respect to fundamental investment restriction #7, if the Fund invests in one or more investment companies that concentrates its investments in a particular industry, the Fund will examine its holdings to assure conformity with fundamental investment restriction #7.

POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust has adopted policies and procedures that govern the disclosure of the Fund's portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of Fund shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates.

Each business day, the Fund's portfolio holdings information will generally be provided for dissemination through the facilities of the National Securities Clearing Corporation ("NSCC") and/or other fee-based subscription services to NSCC members and/or subscribers to those other fee-based subscription services, including Authorized Participants (as defined below), and to entities that publish and/or analyze such information in connection with the process of purchasing or redeeming Creation Units or trading shares of the Fund in the secondary market. This information typically reflects the Fund's anticipated holdings as of the next Business Day.

Access to information concerning the Fund's portfolio holdings may be permitted to personnel of third party service providers, including the Fund's custodian, transfer agent, auditors and counsel, as may be necessary to conduct business in the ordinary course in a manner consistent with such service providers' agreements with the Trust on behalf of the Fund.

The Fund discloses on the Adviser's website at <https://toewsetfs.com> at the start of each Business Day the identities and quantities of the securities and other assets held by the Fund that will form the basis of the Fund's calculation of its NAV on that Business Day. The portfolio holdings so disclosed will be based on information as of the close of business on the prior Business Day and/or trades that have been completed prior to the opening of business on that Business Day and that are expected to settle on that Business Day. The Fund may also concurrently disclose this portfolio holdings information directly to ratings agencies on a daily basis.

Quarterly Portfolio Schedule. The Trust is required to disclose, after its first and third fiscal quarters, the complete schedule of the Fund's portfolio holdings with the SEC on Form N-PORT. The Trust will also disclose a complete schedule of the Fund's portfolio holdings with the SEC on Form N-CSR after its second and fourth quarters.

Form N-PORT and Form N-CSR for the Fund will be available on the SEC's website at www.sec.gov. The Fund's Form N-PORT and Form N-CSR will be available without charge, upon request, by calling 1-888-604-5506 or by writing to: Toews Agility Shares Dynamic Tactical Income ETF, c/o Ultimus Fund Solutions, LLC, P.O. Box 541150, Omaha, Nebraska 68154.

The Adviser. Personnel of the Adviser, including personnel responsible for managing the Fund's portfolio, may have full daily access to Fund portfolio holdings since that information is necessary in order for the Adviser to provide its management, administrative, and investment services to the Fund. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, as demand and liquidity of such securities, as well as for the assistance of portfolio

managers in the trading of such securities, Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

Ultimus Fund Solutions, LLC. Ultimus Fund Solutions, LLC is the transfer agent, fund accountant, administrator and custody administrator for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Brown Brothers Harriman & Co. Brown Brothers Harriman & Co. is custodian and transfer agent for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

RSM US LLP. RSM US LLP is the Fund's independent registered public accounting firm; therefore, its personnel have access to the Fund's portfolio holdings in connection with auditing of the Fund's annual financial statements and providing other audit, tax and related services to the Fund.

Thompson Hine LLP. Thompson Hine LLP is counsel to the Fund; therefore, its personnel have access to the Fund's portfolio holdings in connection with review of the Fund's annual and semi-annual shareholder reports and SEC filings.

Counsel to the Independent Trustees. Counsel to the Independent Trustees and its personnel have access to the Fund's portfolio holdings in connection with the Board's review of the Fund's annual and semi-annual shareholder reports and SEC filings.

Derivatives Risk Consultant: The Trust has engaged a derivatives risk consultant ("Consultant") to consult with the Board, and the Adviser, regarding the effectiveness of derivatives risk management. The Consultant therefore may have access to the Fund's portfolio holdings in order to provide such services to the Trust.

Additions to List of Approved Recipients

The Trust's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Fund's portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information and must be subject to a duty to keep the information confidential. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Fund, the Adviser, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

Compliance with Portfolio Holdings Disclosure Procedures

The Trust's Chief Compliance Officer will report periodically to the Board with respect to compliance with the Fund's portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect The Fund from the potential misuse of holdings information by individuals or firms in possession of that information.

MANAGEMENT

The business of the Trust is managed under the direction of the Board in accordance with the Agreement and Declaration of Trust and the Trust's By-laws (the "Governing Documents"), which have been filed with the Securities and Exchange Commission and are available upon request. The Board consists of six (6) individuals all of whom are not "interested persons" (as defined under the 1940 Act) of the Trust and the Adviser, any investment adviser to any series of the Trust, or the Funds' principal underwriter ("Independent Trustees"). Pursuant to the Governing Documents of the Trust, the Trustees shall elect officers including a President, a Secretary, a Treasurer, a Principal Executive Officer and a Principal Accounting Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust's purposes. The Trustees, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties.

Board Leadership Structure

The Trust is led by Anthony Hertl, an Independent Trustee, who has served as the Chairman of the Board since July 2013. The Board of Trustees is comprised of Mr. Hertl and five (5) additional Independent Trustees. Additionally, under certain 1940 Act governance guidelines that apply to the Trust, the Independent Trustees will meet in executive session, at least quarterly. Under the Trust's Agreement and Declaration of Trust and By-Laws, the Chairman of the Board is responsible for (a) presiding at Board meetings, (b) calling special meetings on an as-needed basis, (c) execution and administration of Trust policies including (i) setting the agendas for Board meetings and (ii) providing information to Board members in advance of each Board meeting and between Board meetings. Generally, the Trust believes it best to have a non-executive Chairman of the Board, who together with the President (principal executive officer), are seen by its shareholders, business partners and other stakeholders as providing strong leadership. The Trust believes that its Chairman, the independent chair of the Audit Committee, and, as an entity, the full Board of Trustees, provide effective leadership that is in the best interests of the Trust, its Funds and each shareholder.

Board Risk Oversight

The Board of Trustees has a standing independent Audit Committee with a separate chair, Mark H. Taylor. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial and reporting risk within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient and communicator of such risk-related information.

Trustee Qualifications

Generally, the Trust believes that each Trustee is competent to serve because of their individual overall merits including: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills.

Anthony J. Hertl has over 20 years of business experience in the financial services industry and related fields including serving as chair of the finance committee for the Borough of Interlaken, New Jersey and Vice President-Finance and Administration of Marymount College, holds a Certified Public Accountant designation, serves or has served as a member of other mutual fund boards outside of the group of Funds managed by the Adviser (the “Fund Complex”) and possesses a strong understanding of the regulatory framework under which investment companies must operate based on his years of service to this Board and other fund boards.

Gary W. Lanzen has over 20 years of business experience in the financial services industry, holds a Master’s degree in Education Administration, is a Certified Financial Planner, serves as a member of two other mutual fund boards outside of the Fund Complex and possesses a strong understanding of the regulatory framework under which investment companies must operate based on his years of service to this Board and other mutual fund boards.

Mark H. Taylor holds PhD, Masters and Bachelors degrees in Accountancy, is a licensed Certified Public Accountant and has over 30 years of academic and professional experience in the accounting and auditing fields, all of which make him particularly qualified to chair the Trust’s Audit Committee. Dr. Taylor is the Director of the Lynn Pippenger School of Accountancy at the Muma College of Business at the University of South Florida and is serving a three-year term as President of the American Accounting Association (AAA) commencing August 2022 (President-Elect 2022-2023, President 2023-2024; Past President 2024-2025). Dr. Taylor previously served as AAA Vice President-Finance, and as President of the Auditing Section of the AAA. Dr. Taylor serves as a member of three other mutual fund boards within the Northern Lights Fund Complex. He served a three-year term on the AICPA’s Auditing Standards Board (2010-2012) and previously completed a fellowship in the Professional Practice Group of the Office of the Chief Accountant at the headquarters of the United States Securities Exchange Commission. Dr. Taylor is a member of two research teams that have received grants from the Center for Audit Quality to study how accounting firms’ tone-at-the top messaging impacts audit performance and how auditors manage the process of auditing fair value measurements and other complex estimates in financial statements. Dr. Taylor has published extensively in leading academic accounting journals, has teaching interests in corporate governance and accounting policy as well as auditing and assurance services at the graduate and undergraduate levels, and possesses a strong understanding of the regulatory framework under which investment companies operate.

John V. Palancia has over 30 years of business experience in financial services industry including serving as the Director of Futures Operations for Merrill Lynch, Pierce, Fenner & Smith, Inc. (“Merrill Lynch”). Mr. Palancia holds a Bachelor of Science degree in Economics. He also possesses a strong understanding of risk management, balance sheet analysis and the regulatory framework under which regulated financial entities must operate based on service to Merrill Lynch. Additionally, he is well versed in the regulatory framework under which investment companies must operate and serves as a member of three other fund boards.

Mark D. Gersten has more than 30 years of experience in the financial services industry, having served in executive roles at AllianceBernstein LP and holding key industry positions at Prudential-Bache Securities and PriceWaterhouseCoopers. He also serves as a member of two other mutual fund boards outside of the Fund Complex. Mr. Gersten is a certified public accountant and holds an MBA in accounting. Like other Trustees, his experience has given him a strong understanding of the regulatory framework under which investment companies operate.

Mark S. Garbin has more than 30 years of experience in corporate balance sheet and income statement risk management for large asset managers, serving as Managing Principal of Coherent Capital Management LLC since 2007. Mr. Garbin has extensive derivatives experience and has provided consulting services to alternative asset managers. He is both a Chartered Financial Analyst and Professional Risk Manager charterholder and holds advanced degrees in international business. The Trust does not believe any one factor is determinative in assessing a Trustee's qualifications, but that the collective experience of each Trustee makes them each highly qualified.

The Trustees and the executive officers of the Trust are listed below with their present positions with the Trust and principal occupations over at least the last five years. The business address of each Trustee and Officer is 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246. All correspondence to the Trustees and Officers should be directed to c/o Ultimus Fund Solutions, LLC, P.O. Box 541150, Omaha, Nebraska 68154.

Independent Trustees

Name, Address and Year of Birth	Position/Term of Office*	Principal Occupation During the Past Five Years	Number of Portfolios in Fund Complex** Overseen by Trustee	Other Directorships held by Trustee During the Past Five Years

N/A	N/A

*The term of office for each Trustee and officer listed above will continue indefinitely until the individual resigns or is removed.

**As of July 31, 2023, the Trust was comprised of 65 active portfolios managed by unaffiliated investment advisers. The term "Fund Complex" applies only to the Funds in the Trust advised by the Fund's Adviser. The Funds do not hold themselves out as related to any other series within the Trust that is not advised by the Fund's Adviser.

Board Committees

Audit Committee

The Board has an Audit Committee that consists of all the Trustees who are not "interested persons" of the Trust within the meaning of the 1940 Act. The Audit Committee's responsibilities include: (i) recommending to the Board the selection, retention or termination of the Trust's independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust's financial statements, including any adjustment to such financial statements recommended

by such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust's independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor's independence; and (v) considering the comments of the independent auditors and management's responses thereto with respect to the quality and adequacy of the Trust's accounting and financial reporting policies and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter and will meet at least annually. During the past fiscal year, the Audit Committee held ten meetings.

Compensation

Effective July 1, 2021, each Trustee who is not affiliated with the Trust or an investment adviser to any series of the Trust will receive a quarterly fee of \$48,750, allocated among each of the various portfolios comprising the Trust and Northern Lights Variable Trust (together, the "Trusts"), a separate registrant that shares a common board with the Trust (the "Board"), for his attendance at the regularly scheduled meetings of the Board, to be paid in advance of each calendar quarter, as well as reimbursement for any reasonable expenses incurred. In addition to which, the Chairman of the Board receives a quarterly fee of \$13,750 and the Audit Committee Chairman receives a quarterly fee of \$10,000.

Prior to July 1, 2021, each Trustee who is not affiliated with the Trusts or an investment adviser to any series of the Trusts received a quarterly fee of \$46,250, allocated among each of the various portfolios comprising the Trusts. In addition to the quarterly fees and reimbursements, the Chairman of the Board previously received a quarterly fee of \$11,250 and the Audit Committee Chairman receives a quarterly fee of \$8,750.

Additionally, in the event a meeting of the Board of Trustees other than its regularly scheduled meetings (a "Special Meeting") is required, each Independent Trustee will receive a fee of \$2,500 per Special Meeting, as well as reimbursement for any reasonable expenses incurred, to be paid by the relevant series of the applicable Trust or its investment adviser depending on the circumstances necessitating the Special Meeting.

None of the executive officers receive compensation from the Trust.

The table below details the amount of compensation the Trustees received from the Funds during the fiscal year ending April 30, 2023. Each Independent Trustee attended all quarterly meetings during the period. The Trust does not have a bonus, profit sharing, pension or retirement plan.

INVESTMENT ADVISER

Investment Adviser and Advisory Agreement

The Adviser of the Fund is Toews Corporation, located at 1750 Zion Road, Suite 201, Northfield, New Jersey 08225. The Adviser was founded by Phillip Toews in 1995. Phillip Toews is the sole shareholder of the Adviser.

Under an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser (the "Advisory Agreement"), the Adviser, under the supervision of the Board, agrees to invest the assets of the Fund in accordance with applicable law and the investment objective, policies and restrictions set forth in the Fund's current Prospectus and Statement of Additional Information, and subject to such further limitations as the Trust may from time to time impose by written notice to the

Adviser. The Adviser shall act as the investment advisor to the Fund and, as such shall (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulate a continuing program for the investment of the assets of the Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold, retained or lent by the Fund, and implement those decisions, including the selection of entities with or through which such purchases, sales or loans are to be effected; provided, that the Adviser will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides the Fund with all necessary office facilities and personnel for servicing the Fund's investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of the Fund or the Adviser performing services relating to research, statistical and investment activities. The Advisory Agreement was most recently approved by the Board of the Trust, including by a majority of the Independent Trustees, at a meeting held on June 21-22, 2023.

The Fund pays an annual management fee (computed daily and payable monthly) of 0.85% of the Fund's average daily net assets to the Adviser pursuant to the Advisory Agreement. For the fiscal year ended April 30, 2022, the Fund incurred \$329,607 in advisory fees and waived advisory fees in the amount of \$123,136. For the fiscal year ended April 30, 2023, the Fund incurred \$310,379 in advisory fees and waived advisory fees in the amount of \$133,279.

The Adviser has contractually agreed to reduce its fees and/or absorb expenses of the Fund, through at least August 31, 2024, to ensure that the Total Annual Fund Operating Expenses After Fee Waiver and/or Reimbursement (exclusive of any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and trustees, contractual indemnification of Fund service providers (other than the Adviser)) will not exceed to 0.95%; subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years from the waiver or reimbursement) if such recoupment can be achieved. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance. A discussion regarding the basis for the Board of Trustees' approval of the renewal of the advisory agreement is available in the Fund's annual report to shareholders for the fiscal year ended April 30, 2023.

Expenses not expressly assumed by the Adviser under the Advisory Agreement are paid by the Fund. Under the terms of the Advisory Agreement, the Fund is responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser or Distributor (as defined under the section entitled ("The Distributor")) (c) the fees and certain expenses of the Custodian (as defined under the section entitled "Custodian") and Transfer and Dividend Disbursing Agent (as defined under the section entitled "Transfer Agent"), including the cost of maintaining certain required records of the Fund and of pricing the Fund's shares, (d) the charges and expenses of legal counsel and independent accountants for the Fund, (e) brokerage commissions and any issue or transfer taxes chargeable to the Fund in connection with its securities transactions, (f) all taxes and corporate fees payable by the Fund to governmental agencies, (g) the fees of any trade association of which the

Fund may be a member, (h) the cost of fidelity and liability insurance, (i) the fees and expenses involved in registering and maintaining registration of the Fund and of shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Fund's registration statements and prospectuses for such purposes, (j) all expenses of shareholders and Trustees' meetings (including travel expenses of trustees and officers of the Trust who are not directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders and (k) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

The Advisory Agreement continued in effect for two (2) years initially and shall continue from year to year thereafter provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast in person at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of the Fund. The Advisory Agreement may be terminated without penalty on 60 days written notice by a vote of a majority of the Trustees or by the Adviser, or by holders of a majority of the Fund's outstanding shares (with respect to the Fund). The Advisory Agreement shall terminate automatically in the event of its assignment.

Codes of Ethics

The Trust, the Adviser and the Distributor have each adopted codes of ethics (each a "Code") under Rule 17j-1 under the 1940 Act that governs the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust. Under the Codes, the Trustees are permitted to invest in securities that may also be purchased by the Fund.

In addition, the Trust has adopted a code of ethics (the "Trust Code"), which applies only to the Trust's executive officers to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote (i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; (ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that the Trust files with, or submits to, the SEC and in other public communications made by the Fund; (iii) compliance with applicable governmental laws, rule and regulations; (iv) the prompt internal reporting of violations of the Trust Code to an appropriate person or persons identified in the Trust Code; and (v) accountability for adherence to the Trust Code.

Proxy Voting Policies

The Board has adopted Proxy Voting Policies and Procedures ("Policies") on behalf of the Trust, which delegate the responsibility for voting proxies to the Adviser or its designee, subject to the Board's continuing oversight. The Policies require that the Adviser or its designee vote proxies received in a manner consistent with the best interests of The Fund and shareholders. The Policies also require the Adviser or its designee to present to the Board, at least annually, the Adviser's Proxy Policies, or the proxy policies of the Adviser's designee, and a record of each proxy voted by the Adviser or its designee on behalf of The Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest.

Where a proxy proposal raises a material conflict between the Adviser's interests and the Fund's interests, the Adviser will resolve the conflict by voting in accordance with the policy guidelines or at the client's directive using the recommendation of an independent third party. If the third party's recommendations are not received in a timely fashion, the Adviser will abstain from voting the securities held by that client's account. A copy of the Adviser's and proxy voting policies is attached hereto as Appendix A.

More information. Information regarding how the Fund voted proxies relating to portfolio securities held by the Fund during the most recent 12-month period ending June 30 will be available (1) without charge, upon request, by calling the Fund at 1-855-604-5506; and (2) on the U.S. Securities and Exchange Commission's website at <http://www.sec.gov>. In addition, a copy of the Fund's proxy voting policies and procedures are also available by calling 1-855-604-55063 and will be sent within three business days of receipt of a request.

THE DISTRIBUTOR

Northern Lights Distributors, LLC, located at 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska 68022 (the "Distributor") serves as the principal underwriter and national distributor for the shares of the Trust pursuant to an underwriting agreement with the Trust (the "Underwriting Agreement"). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state's securities laws and is a member of the FINRA. The offering of the Fund's shares is continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of the Fund's shares, will use reasonable efforts to facilitate the sale of the Fund's shares.

The Underwriting Agreement provides that, unless sooner terminated, it will continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not interested persons of the Trust or of the Distributor by vote cast in person at a meeting called for the purpose of voting on such approval.

The Underwriting Agreement may be terminated by the Fund at any time, without the payment of any penalty, by vote of a majority of the entire Board of the Trust or by vote of a majority of the outstanding shares of the Fund on 60 days written notice to the Distributor, or by the Distributor at any time, without the payment of any penalty, on 60 days written notice to the Fund. The Underwriting Agreement will automatically terminate in the event of its assignment.

The following table sets forth the total compensation received by the Distributor from the Fund during the fiscal year ended April 30, 2022:

Net Underwriting Discounts and Commissions	Compensation on Redemptions and Repurchases	Brokerage Commissions	Other Compensation
\$0	\$0	\$0	*

* The Distributor received \$29,068 from the Adviser as compensation for its distribution services to the Fund.

The following table sets forth the total compensation received by the Distributor from the Fund during the fiscal year ended April 30, 2023:

Net Underwriting Discounts and Commissions	Compensation on Redemptions and Repurchases	Brokerage Commissions	Other Compensation
\$0	\$0	\$0	*

* The Distributor received \$38,989 from the Adviser as compensation for its distribution services to the Fund.

The Distributor may enter into selling agreements with broker-dealers that solicit orders for the sale of shares of the Fund and may allow concessions to dealers that sell shares of the Fund.

Rule 12b-1 Plan

The Trust, with respect to the Fund, has adopted a Master Distribution and Shareholder Servicing Plan pursuant to Rule 12b-1 under the 1940 Act (the "Plan") pursuant to which the Fund is authorized to pay the Distributor, as compensation for Distributor's account maintenance services under the Plan. The Board has approved a distribution and shareholder servicing fee at the rate of up to 0.25% of the Fund's average daily net assets. Such fees are to be paid by the Fund monthly, or at such other intervals as the Board shall determine. Such fees shall be based upon the Fund's average daily net assets during the preceding month and shall be calculated and accrued daily. The Fund may pay fees to the Distributor at a lesser rate, as agreed upon by the Board of Trustees of the Trust and the Distributor. The Plan authorizes payments to the Distributor as compensation for providing account maintenance services to Fund shareholders, including arranging for certain securities dealers or brokers, administrators and others ("Recipients") to provide these services and paying compensation for these services. The Fund will bear its own costs of distribution with respect to its shares. The Plan was adopted in order to permit the implementation of the Fund's method of distribution. No fees are currently paid by the Fund under the Plan, and there are no current plans to impose such fees. In the event such fees were to be charged, over time they would increase the cost of an investment in the Fund.

The services to be provided by Recipients may include, but are not limited to, the following: assistance in the offering and sale of Fund shares and in other aspects of the marketing of the shares to clients or prospective clients of the respective recipients; answering routine inquiries concerning the Fund; assisting in the establishment and maintenance of accounts or sub-accounts in the Fund and in processing purchase and redemption transactions; making the Fund's investment plan and shareholder services available; and providing such other information and services to investors in shares of the Fund as the Distributor or the Trust, on behalf of the Fund, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to the Fund.

During the fiscal year ended April 30, 2022, the Fund paid \$0 in distribution related fees pursuant to the Plan. These fees were allocated as follows:

Actual 12b-1 Expenditures Paid by the Fund During the Fiscal Year Ended April 30,2022	
Advertising/Marketing	None
Printing/Postage	None
Payment to distributor	\$0
Payment to dealers	\$0
Compensation to sales personnel	None
Other	\$0
Total	\$0

During the fiscal year ended April 30, 2023, the Fund paid \$0 in distribution related fees pursuant to the Plan. These fees were allocated as follows:

Actual 12b-1 Expenditures Paid by the Fund During the Fiscal Year Ended April 30,2023	
Advertising/Marketing	None
Printing/Postage	None
Payment to distributor	\$0
Payment to dealers	\$0
Compensation to sales personnel	None
Other	\$0
Total	\$0

The Distributor is required to provide a written report, at least quarterly, to the Board of Trustees of the Trust, specifying in reasonable detail the amounts expended pursuant to the Plan and the purposes for which such expenditures were made. Further, the Distributor will inform the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The Plan may not be amended to increase materially the amount of the Distributor's compensation to be paid by the Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the Fund (as defined in the 1940 Act). All material amendments must be approved by a majority of the Board of Trustees of the Trust and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on the Plan. During the term of the Plan, the selection and nomination of non-interested Trustees of the Trust will be committed to the discretion of current non-interested Trustees. The Distributor will preserve copies of the Rule 12b-1 Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to a Plan will be in writing and provide that: (a) it may be terminated by the Trust or the Fund at any time upon sixty days written notice, without the payment of any penalty, by vote of a majority of the respective Rule 12b-1 Trustees, or by vote of a majority of the outstanding voting securities of the Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on such agreement.

PORTFOLIO MANAGERS

Randy Schroeder, Philip Toews, Jason Graffius and Charles Collins serve as the portfolio managers of the Fund. As of April 30, 2023, the portfolio managers are responsible for the portfolio management of the following types of accounts in addition to the Fund:

Total Other Accounts By Type	Total Number of Accounts by Account Type	Total Assets By Account Type	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee (in millions)
Randy Schroeder				
Registered Investment Companies	8	\$1.03 billion	0	0
Other Pooled Investment Vehicles	0	N/A	0	0
Other Accounts	438	\$31.7 million	0	0

Total Other Accounts By Type	Total Number of Accounts by Account Type	Total Assets By Account Type	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee
Philip Toews				
Registered Investment Companies	8	\$1.03 billion	0	0

Other Accounts	438	\$31.7 million	0	0

Total Other Accounts By Type	Total Number of Accounts by Account Type	Total Assets By Account Type	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee
Jason Graffius				
Registered Investment Companies	8	\$1.03 billion	0	0
Other Pooled Investment Vehicles	0	N/A	0	0
Other Accounts	438	\$31.7 million	0	0

Total Other Accounts By Type	Total Number of Accounts by Account Type	Total Assets By Account Type	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee
Charles Collins				
Registered Investment Companies	8	\$1.03 billion	0	0
Other Pooled Investment Vehicles	0	N/A	0	0
Other Accounts	438	\$31.7 million	0	0

Conflicts of Interest

As indicated in the table above, a portfolio manager may manage numerous accounts for multiple clients. These accounts may include registered investment companies, other types of pooled accounts (e.g., collective investment funds), and separate accounts (i.e., accounts managed on behalf of individuals or public or private institutions). The portfolio manager makes investment decisions for each account based on the investment objectives and policies and other relevant investment considerations applicable to that account.

When a portfolio manager has responsibility for managing more than one account, potential conflicts of interest may arise. Those conflicts could include preferential treatment of one account over others in terms of allocation of resources or of investment opportunities. For instance, the Adviser may receive fees from certain accounts that are higher than the fee it receives from the Fund, or it may receive a performance-based fee on certain accounts. In those instances, the portfolio manager may have an incentive to favor the higher and/or performance-based fee accounts over the Fund.

When allocating investments among client accounts, the portfolio manager has the fiduciary obligation to treat each client equally, regardless of account size or fees paid. All clients at the same custodian (or trading desk) receive the same average price for each transaction. When multiple trading desks or custodians are used to execute transactions, the portfolio managers execute the trades in such a fashion as to ensure no client grouping consistently receives preferential treatment. When trades in the same security must be executed over multiple days, the portfolio managers execute the trades in a random order to ensure no client grouping consistently receives preferential treatment.

Compensation

Mr. Toews earns a salary and profitability bonus from the Adviser, as 100% owner of the Adviser, he is compensated primarily out of the Adviser's profits. Mr. Schroeder, Mr. Graffius and Mr. Collins each earn a salary and discretionary bonus from the Adviser.

Ownership of Securities

The following table shows the dollar range of equity securities beneficially owned by the portfolio managers in the Fund as of April 30, 2023.

Name of Portfolio Manager	Dollar Range of Equity Securities in the Fund
Randy Schroeder	\$0
Philip Toews	\$1-\$10,000
Jason Graffius	\$1-\$10,000
Charles Collins	\$0

ALLOCATION OF PORTFOLIO BROKERAGE

Specific decisions to purchase or sell securities for the Fund are made by the co-portfolio managers who are employees of the Adviser. The Adviser is authorized by the Trustees to allocate the orders placed by them on behalf of the Fund to brokers or dealers who may, but need not, provide research or statistical material or other services to the Fund or the Adviser for the Fund's use. Such allocation is to be in such amounts and proportions as the Adviser may determine.

In selecting a broker or dealer to execute each particular transaction, the Adviser will take the following into consideration:

- the best net price available;
- the reliability, integrity and financial condition of the broker or dealer;
- the size of and difficulty in executing the order; and
- the value of the expected contribution of the broker or dealer to the investment performance of the Fund on a continuing basis.

Brokers or dealers executing a portfolio transaction on behalf of the Fund may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage and research services provided to the Fund. In allocating portfolio brokerage, the Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser exercises investment discretion. Some of the services received as the result of Fund transactions may primarily benefit accounts other than the Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit the Fund. For the fiscal year ended April 30, 2022, the Fund incurred \$42,841 brokerage commissions. For the fiscal year ended April 30, 2023, the Fund incurred \$59,419 brokerage commissions.

PORTFOLIO TURNOVER

The Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year. The calculation excludes from both the numerator and the denominator securities with maturities at the time of acquisition of one year or less. High portfolio turnover involves correspondingly greater brokerage commissions and other transaction costs, which

will be borne directly by the Fund. A 100% turnover rate would occur if all of the Fund's portfolio securities were replaced once within a one-year period. For the fiscal year ended April 30, 2022, the Fund's portfolio turnover rate was 548%. For the fiscal period ended April 30, 2023, the Fund's portfolio turnover rate was 614%.

OTHER SERVICE PROVIDERS

Fund Administration

Ultimus Fund Solutions, LLC, (the "Administrator" of "UFS"), which has its principal office at 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska 68022, and is primarily in the business of providing administrative and fund accounting services to retail and institutional mutual funds. The Administrator is an affiliate of the Distributor.

Effective February 1, 2019, NorthStar Financial Services Group, LLC, the parent company of Gemini Fund Services, LLC and its affiliated companies including Northern Lights Distributors, LLC and Northern Lights Compliance Services, LLC ("NLCS") and Blu Giant, LLC (collectively, the "Gemini Companies"), sold its interest in the Gemini Companies to a third party private equity firm that contemporaneously acquired UFS (an independent mutual fund administration firm) and its affiliates (collectively, the "Ultimus Companies"). As a result of these separate transactions, the Gemini Companies and the Ultimus Companies are now indirectly owned through a common parent entity, The Ultimus Group, LLC.

Pursuant to Fund Services Agreement with the Fund, the Administrator provides administrative services to the Fund, subject to the supervision of the Board. The Administrator may provide persons to serve as officers of the Fund. Such officers may be directors, officers or employees of the Administrator or its affiliates.

The Fund Services Agreement is dated June 28, 2017. The Agreement will remain in effect for two years from the effective date of the agreement, and will remain in effect subject to annual approval of the Board for one-year periods thereafter. The Administration Service Agreement is terminable by the Board or the Administrator on ninety days' written notice and may be assigned provided the non-assigning party provides prior written consent. This Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Administrator or reckless disregard of its obligations thereunder, the Administrator shall not be liable for any action or failure to act in accordance with its duties thereunder.

Under the Fund Services Agreement, the Administrator provides facilitating administrative services, including: (i) providing services of persons competent to perform such administrative and clerical functions as are necessary to provide effective administration of the Fund; (ii) facilitating the performance of administrative and professional services to the Fund by others, including the Fund's Custodian; (iii) preparing, but not paying for, the periodic updating of the Fund's Registration Statement, Prospectuses and Statement of Additional Information in conjunction with Fund counsel, including the printing of such documents for the purpose of filings with the SEC and state securities administrators, and preparing reports to the Fund's shareholders and the SEC; (iv) preparing in conjunction with Fund counsel, but not paying for, all filings under the securities or "Blue Sky" laws of such states or countries as are designated by the Distributor, which may be required to register or qualify, or continue the registration or qualification, of the Fund and/or its shares under such laws; (v) preparing notices and agendas for meetings of the Board and minutes of such meetings in all matters required by the 1940 Act to be acted upon by the Board; and (vi) monitoring daily and periodic

compliance with respect to all requirements and restrictions of the 1940 Act, the Internal Revenue Code and the Prospectuses.

For administrative services rendered to the Fund under the Agreement, the Fund pays UFS the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. For the fund accounting services rendered to the Fund under the Agreement, the Fund pays UFS the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. The Fund also pays UFS for any out-of-pocket expenses. For the fiscal period ended April 30, 2021, the Fund incurred \$31,390 in administrative fees. For the fiscal year ended April 30, 2022, the Fund incurred \$47,485 in administrative fees. For the fiscal year ended April 30, 2023, the Fund incurred \$34,757 in administrative fees.

The Administrator also provides the Fund with accounting services, including: (i) daily computation of net asset value; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Fund; (vi) maintaining certain books and records described in Rule 31a-1 under the 1940 Act, and reconciling account information and balances among the Fund's custodian and Adviser; and (vii) monitoring and evaluating daily income and expense accruals, and sales and redemptions of shares of the Fund.

For the fund accounting services rendered to the Fund under the Agreement, the Fund pays UFS the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. The Fund also pays UFS for any out-of-pocket expenses. For the fiscal year ended April 30, 2023, the Fund incurred \$22,627 in accounting fees.

Transfer Agent

Brown Brothers Harriman & Co. ("BBH"), located at 50 Post Office Square, Boston, MA 02110, acts as transfer, dividend disbursing, and shareholder servicing agent for the Fund pursuant to written agreement with Fund (the "Transfer Agent"). Under the agreement, the Transfer Agent is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations. For the fiscal period ended April 30, 2021, the Fund incurred \$12,228 in transfer agency fees. For the fiscal year ended April 30, 2022, the Fund incurred \$10,201 in transfer agency fees. For the fiscal year ended April 30, 2023, the Fund incurred \$10,559 in transfer agency fees.

Custodian

BBH, located at 50 Post Office Square, Boston, MA 02110 (the "Custodian"), serves as the custodian of the Fund's assets pursuant to a Custodian and Transfer Agent Agreement by and between the Custodian and the Trust on behalf of the Fund. The Custodian's responsibilities include safeguarding and controlling the Fund's cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Fund's investments. Pursuant to the Custodian and Transfer Agent Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. The Fund may employ foreign sub-custodians that are approved by the Board to hold foreign assets.

Compliance Officer

Northern Lights Compliance Services, LLC (“NLCS”), 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022, an affiliate of GFS and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. NLCS’s compliance services consist primarily of reviewing and assessing the policies and procedures of the Trust and its service providers pertaining to compliance with applicable federal securities laws, including Rule 38a-1 under the 1940 Act. For the compliance services rendered to the Fund, the Fund pays NLCS a one-time fee plus an annual asset based fee, which scales downward based upon net assets. The Fund also pays NLCS for any out-of-pocket expenses. For the fiscal period ended April 30, 2021, the Fund incurred \$13,981 in compliance service fees. For the fiscal year ended April 30, 2022, the Fund incurred \$16,985 in compliance service fees. For the fiscal year ended April 30, 2023, the Fund incurred \$14,079 in compliance service fees.

Securities Lending Activities

Securities Finance Trust Company (“eSec”) serves as the Fund’s securities lending agent pursuant to a Securities Lending Authorization Agreement between eSec and the Trust on behalf of the Fund.

The dollar amounts of income and fees and compensation paid to the Fund and eSec related to the Fund’s respective securities lending activities during fiscal year ended April 30, 2023 were as follows:

Gross income from securities lending activities (including income from cash collateral reinvestment)	\$22,582
Fees and/or compensation for securities lending activities and related services	0
Fees paid to securities lending agent from a revenue split	\$(1,561)
Fees paid for any cash collateral management service (including fees deducted from a pooled cash collateral reinvestment vehicle) that are not included in the revenue split*	0
Administrative fees not included in revenue split	0
Indemnification fees not included in revenue split	0
Rebate (paid to borrower)/Premium (paid to lender)	\$(14,778)
Other fees not included in revenue split	0
Aggregate fees/compensation for securities lending activities	\$(16,339)
Net income from securities lending activities	\$6,174

DESCRIPTION OF SHARES

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series or classes. Matters such as election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal, per-class, dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of the Fund. All shares issued are fully paid and non-assessable.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust's secretary serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Fund's Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and a providing a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

PURCHASE, REDEMPTION AND PRICING OF SHARES

Calculation of Share Price

As indicated in the Prospectus under the heading "Net Asset Value," the NAV of the Fund's shares is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding (on a per-class basis) of the Fund. Shares of the Fund are listed for trading on the Exchange and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV.

The Administrator calculates the Fund's NAV at the close of regular trading (normally 4:00 p.m., Eastern time) every day that the New York Stock Exchange ("NYSE") is open. NAV is calculated by deducting all of the Fund's liabilities from the total value of its assets and dividing the result by the number of Shares outstanding, rounding to the nearest cent. All valuations are subject to review by the Trust's Board or its delegate.

In determining NAV, expenses are accrued and applied daily and securities and other assets for which market quotations are readily available are valued at market value. The NAV for the Fund will be calculated and disseminated daily. The value of the Fund's portfolio securities is based on market value when market quotations are readily available.

Exchange-traded securities, such as common and preferred stocks, ETFs, ETPs, ETNs, closed-end funds, REITs, MLPs, REOCs and similar instruments, generally are valued by using market quotations, but may be valued on the basis of prices furnished by a pricing service when the Adviser believes such prices accurately reflect the fair market value of such securities. Securities that are traded on any stock exchange or on the Exchange are generally valued by the pricing service at the last quoted sale price. Lacking a last sale price, an equity security is generally valued by the pricing service at its last bid price. When market quotations are not readily available, when the Adviser determines that the market quotation or the price provided by the pricing service does not accurately reflect the current market value, or when restricted or illiquid securities are being valued, such securities are valued as determined in good faith by the Adviser. If a security's market price is not readily available, the security will be valued at fair value as determined by the Adviser in accordance with the Trust's valuation policies and procedures approved by the Board. The values of assets denominated in foreign currencies are converted into U.S. dollars based on the mean of the current bid and asked prices by major banking institutions and currency dealers.

Bonds, notes, debentures or similar instruments are valued by a pricing service when the Adviser believes such prices are accurate and reflect the fair market value of such securities. If the Adviser decides that a price provided by the pricing service does not accurately reflect the fair market value of the securities, when prices are not readily available from a pricing service, or when restricted or illiquid securities are being valued, securities are valued at fair value as determined in good faith by the Adviser, subject to review by the Board of Trustees. Short-term investments having a maturity of 60 days or less may be amortized to maturity, provided such valuations represent par value.

Futures contracts listed for trading on a futures exchange or board of trade for which market quotations are readily available are valued at the last quoted sales price or, in the absence of a sale, at the mean of the last bid and ask prices.

Even when market quotations are available, they may be stale or unreliable because the validity of market quotations appears to be questionable; the number of quotations is such as to indicate that there is a thin market in the security; a significant event occurs after the close of a market but before the Fund's NAV calculation that may affect a security's value; or the Adviser is aware of any other data that calls into question the reliability of market quotations such as issuer-specific events, which may include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where the Adviser determines that the closing price of the security is unreliable, the Adviser will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing involves subjective judgments, and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security.

Because foreign markets may be open on different days than the days during which a shareholder may purchase Shares, the value of the Fund's investments may change on days when shareholders are not able to purchase Shares.

Creation Units

The Fund sells and redeems Shares in Creation Units on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt of an order in proper form on any Business Day. A "Business Day" is any day on which the NYSE is open for business. As of the date of this SAI, the NYSE observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

A Creation Unit is an aggregation of 25,000 Shares. The Board may declare a split or a consolidation in the number of Shares outstanding of the Fund or Trust, and make a corresponding change in the number of Shares in a Creation Unit.

Authorized Participants

To purchase or redeem any Creation Units, you must be, or transact through, an Authorized Participant. In order to be an Authorized Participant, you must be either a broker-dealer or other participant ("Participating Party") in the Continuous Net Settlement System ("Clearing Process") of the National Securities Clearing Corporation ("NSCC") or a participant in DTC with access to the DTC system ("DTC Participant"), and you must execute an agreement ("Participant Agreement") with the Distributor that governs transactions in the Fund's Creation Units.

Investors who are not Authorized Participants but want to transact in Creation Units may contact the Distributor for the names of Authorized Participants. An Authorized Participant may require investors to enter into a separate agreement to transact through it for Creation Units and may require orders for purchases of shares placed with it to be in a particular form. Investors transacting through a broker that is not itself an Authorized Participant and therefore must still transact through an Authorized Participant may incur additional charges. There are expected to be a limited number of Authorized Participants at any one time.

Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor. Market disruptions and telephone or other communication failures may impede the transmission of orders.

Transaction Fees

A fixed fee payable to the Custodian is imposed on each creation and redemption transaction regardless of the number of Creation Units involved in the transaction (“Fixed Fee”). Purchases and redemptions of Creation Units for cash or involving cash-in-lieu (as defined below) are required to pay an additional variable charge to compensate the Fund and its ongoing shareholders for brokerage and market impact expenses relating to Creation Unit transactions (“Variable Charge,” and together with the Fixed Fee, the “Transaction Fees”). With the approval of the Board, the Adviser may waive or adjust the Transaction Fees, including the Fixed Fee and/or Variable Charge (shown in the table below), from time to time. In such cases, the Authorized Participant will reimburse the Fund for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased by the Fund and the cash-in-lieu amount, applicable registration fees, brokerage commissions and certain taxes. In addition, purchasers of Creation Units are responsible for the costs of transferring the Deposit Securities to the account of the Fund. Investors who use the services of a broker, or other such intermediary may be charged a fee for such services. The Transaction Fees for the Fund are listed in the table below.

Fee for In-Kind and Cash Purchases	Maximum Additional Variable Charge for Cash Purchases*
\$200	200 basis points (2.00)%

* As a percentage of the amount invested.

The Clearing Process

Transactions by an Authorized Participant that is a Participating Party using the NSCC system are referred to as transactions “through the Clearing Process.” Transactions by an Authorized Participant that is a DTC Participant using the DTC system are referred to as transactions “outside the Clearing Process.” The Clearing Process is an enhanced clearing process that is available only for certain securities and only to DTC participants that are also participants in the Continuous Net Settlement System of the NSCC. In-kind (portions of) purchase orders not subject to the Clearing Process will go through a manual clearing process run by DTC. Portfolio Deposits that include government securities must be delivered through the Federal Reserve Bank wire transfer system (“Federal Reserve System”). Fund Deposits that include cash may be delivered through the Clearing Process or the Federal Reserve System. In-kind deposits of securities for orders outside the Clearing Process must be delivered through the Federal Reserve System (for government securities) or through DTC (for corporate securities).

Foreign Securities

Because certain of the underlying portfolio securities in which the Fund invests may trade on days that the Exchange is closed or are otherwise not Business Days for the Fund, shareholders may not be able to redeem their shares of the Fund, or to purchase or sell shares of the Fund on the Exchange, on days when the NAV of the Fund could be significantly affected by events in the relevant foreign markets.

Purchasing Creation Units

Portfolio Deposit

The consideration for a Creation Unit generally consists of the Deposit Securities and a Cash Component. Together, the Deposit Securities and the Cash Component constitute the “Portfolio Deposit.” The Cash Component serves the function of compensating for any differences between the net asset value per Creation Unit and the Deposit Securities. Thus, the Cash Component is equal to the difference between (x) the net asset value per Creation Unit of the Fund and (y) the market value of the Deposit Securities. If (x) is more than (y), the Authorized Participant will pay the Cash Component to the Fund. If (x) is less than (y), the Authorized Participant will receive the Cash Component from the Fund.

On each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the Adviser through the Custodian makes available through NSCC the name and amount of each Deposit Security in the current Portfolio Deposit (based on information at the end of the previous Business Day) for the Fund and the (estimated) Cash Component, effective through and including the previous Business Day, per Creation Unit. The Deposit Securities announced are applicable to purchases of Creation Units until the next announcement of Deposit Securities.

Payment of any stamp duty or the like shall be the sole responsibility of the Authorized Participant purchasing a Creation Unit. The Authorized Participant must ensure that all Deposit Securities properly denote change in beneficial ownership.

Custom Orders and Cash-in-lieu

The Fund may, in its sole discretion, permit or require the substitution of an amount of cash (“cash-in-lieu”) to be added to the Cash Component to replace any Deposit Security. The Fund may permit or require cash-in-lieu when, for example, a Deposit Security may not be available in sufficient quantity for delivery or may not be eligible for transfer through the systems of DTC or the Clearing Process. Similarly, the Fund may permit or require cash in lieu of Deposit Securities when, for example, the Authorized Participant or its underlying investor is restricted under U.S. or local securities laws or policies from transacting in one or more Deposit Securities. The Fund will comply with the federal securities laws in accepting Deposit Securities including that the Deposit Securities are sold in transactions that would be exempt from registration under the Securities Act. All orders involving cash-in-lieu are considered to be “Custom Orders.”

Purchase Orders

To order a Creation Unit, an Authorized Participant must submit an irrevocable purchase order to the Distributor.

Timing of Submission of Purchase Orders

An Authorized Participant must submit an irrevocable purchase order no later than the earlier of (i) 4:00 p.m. Eastern Time or (ii) the closing time of the bond markets and/or the trading session on the Exchange, on any Business Day in order to receive that Business Day’s NAV (“Cut-off Time”). The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the “Transmittal Date.” An order to create

Creation Units is deemed received on a Business Day if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating custom orders and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve Bank wire system, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the "Settlement Date," which is generally the Business Day immediately following the Transmittal Date ("T+1") for cash and the third Business Day following the Transmittal Date for securities ("T+3").

Orders Using the Clearing Process

If available, (portions of) orders may be settled through the Clearing Process. In connection with such orders, the Distributor transmits, on behalf of the Authorized Participant, such trade instructions as are necessary to effect the creation order. Pursuant to such trade instructions, the Authorized Participant agrees to deliver the requisite Portfolio Deposit to the Fund, together with such additional information as may be required by the Distributor. Cash Components will be delivered using either the Clearing Process or the Federal Reserve System.

Orders Outside the Clearing Process

If the Clearing Process is not available for (portions of) an order, Portfolio Deposits will be made outside the Clearing Process. Orders outside the Clearing Process must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will be effected through DTC. The Portfolio Deposit transfer must be ordered by the DTC Participant on the Transmittal Date in a timely fashion so as to ensure the delivery of Deposit Securities (whether standard or custom) through DTC to the Fund account by 11:00 a.m., Eastern time, on T+1. The Cash Component, along with any cash-in-lieu and Transaction Fee, must be transferred directly to the Custodian through the Federal Reserve System in a timely manner so as to be received by the Custodian no later than 12:00 p.m., Eastern Time, on T+1. If the Custodian does not receive both the Deposit Securities and the cash by the appointed time, the order may be canceled. A canceled order may be resubmitted the following Business Day but must conform to that Business Day's Portfolio Deposit. Authorized Participants that submit a canceled order will be liable to the Fund for any losses incurred by the Fund in connection therewith.

Orders involving foreign Deposit Securities are expected to be settled outside the Clearing Process. Thus, upon receipt of an irrevocable purchase order, the Distributor will notify the Adviser and the Custodian of such order. The Custodian, who will have caused the appropriate local sub-custodian(s) of the Fund to maintain an account into which an Authorized Participant may deliver Deposit Securities (or cash -in-lieu), with adjustments determined by the Fund, will then provide information of the order to such local sub-custodian(s). The ordering Authorized Participant will then deliver the Deposit Securities (and any cash-in-lieu) to the Fund's account at the applicable local sub-custodian. The Authorized Participant must also make available on or before the contractual settlement date, by means satisfactory to the Fund, immediately available or same day funds in U.S. dollars estimated by the Fund to be sufficient to pay the Cash Component and Transaction Fee. When a relevant local market is closed due to local market holidays, the local market settlement process will not commence until the end of the local holiday period. Settlement must occur by 2:00 p.m., Eastern Time, on the contractual settlement date.

Acceptance of Purchase Order

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Fund. A Fund's determination shall be final and binding.

A Fund reserves the absolute right to reject or revoke acceptance of a purchase order transmitted to it by the Distributor if (a) the order is not in proper form; (b) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (c) the Deposit Securities delivered do not conform to the Deposit Securities for the applicable date; (d) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (e) the acceptance of the Portfolio Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Portfolio Deposit would otherwise, in the discretion of the Trust, Fund or the Adviser, have an adverse effect on the Trust, Fund or the rights of beneficial owners; or (g) in the event that circumstances outside the control of the Trust, the Distributor and the Adviser make it for all practical purposes impossible to process purchase orders. Examples of such circumstances include acts of God; public service or utility problems resulting in telephone, telecopy or computer failures; fires, floods or extreme weather conditions; market conditions or activities causing trading halts; systems failures involving computer or other informational systems affecting the Trust, the Distributor, DTC, NSCC, the Adviser, the Fund's Custodian, a sub-custodian or any other participant in the creation process; and similar extraordinary events. The Distributor shall notify an Authorized Participant of its rejection of the order. The Fund, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Portfolio Deposits, and they shall not incur any liability for the failure to give any such notification.

Issuance of a Creation Unit

Once the Fund has accepted an order, upon next determination of the Fund's NAV, the Fund will confirm the issuance of a Creation Unit, against receipt of payment, at such NAV. The Distributor will transmit a confirmation of acceptance to the Authorized Participant that placed the order.

Except as provided below, a Creation Unit will not be issued until the Fund obtains good title to the Deposit Securities and the Cash Component, along with any cash-in-lieu and Transaction Fee. Except as provided in Appendix C, the delivery of Creation Units will generally occur no later than T+3.

In certain cases, Authorized Participants will create and redeem Creation Units on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

With respect to orders involving foreign Deposit Securities, when the applicable local sub-custodian(s) have confirmed to the Custodian that the Deposit Securities (or cash -in-lieu) have been delivered to the Fund's account at the applicable local sub-custodian(s), the Distributor and the Adviser shall be notified of such delivery, and the Fund will issue and cause the delivery of the Creation Unit. While, as stated above, Creation Units are generally delivered on T+3, the Fund may settle Creation Unit transactions on a basis other than T+3 in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances.

A Fund may issue a Creation Unit prior to receiving good title to the Deposit Securities, under the following circumstances. Pursuant to the applicable Participant Agreement, the Fund may issue a Creation Unit notwithstanding that (certain) Deposit Securities have not been delivered, in reliance on an undertaking by the relevant Authorized Participant to deliver the missing Deposit Securities as soon as possible, which undertaking is secured by such Authorized Participant's delivery to and maintenance with the Custodian of collateral having a value equal to at least 115% of the value of the missing Deposit Securities ("Collateral"), as adjusted by time to time by the Adviser. Such Collateral will have a value greater than the NAV of the Creation Unit on the date the order is placed. Such collateral must be delivered no later than 2:00 p.m., Eastern Time, on T+1. The only Collateral that is acceptable to the Fund is cash in U.S. Dollars.

While (certain) Deposit Securities remain undelivered, the Collateral shall at all times have a value equal to at least 115% (as adjusted by the Adviser) of the daily marked-to-market value of the missing Deposit Securities. At any time, the Fund may use the Collateral to purchase the missing securities, and the Authorized Participant will be liable to the Fund for any costs incurred thereby or losses resulting therefrom, whether or not they exceed the amount of the Collateral, including any Transaction Fee, any amount by which the purchase price of the missing Deposit Securities exceeds the market value of such securities on the Transmittal Date, brokerage and other transaction costs. The Trust will return any unused Collateral once all of the missing securities have been received by the Fund. More information regarding the Fund's current procedures for collateralization is available from the Distributor.

Cash Purchase Method

When cash purchases of Creation Units are available or specified for the Fund, they will be effected in essentially the same manner as in-kind purchases. In the case of a cash purchase, the investor must pay the cash equivalent of the Portfolio Deposit. In addition, cash purchases will be subject to Transaction Fees, as described above.

Redeeming a Creation Unit

Redemption Basket

The consideration received in connection with the redemption of a Creation Unit generally consists of an in-kind basket of designated securities ("Redemption Securities") and a Cash Component. Together, the Redemption Securities and the Cash Component constitute the "Redemption Basket."

There can be no assurance that there will be sufficient liquidity in Shares in the secondary market to permit assembly of a Creation Unit. In addition, investors may incur brokerage and other costs in connection with assembling a Creation Unit.

The Cash Component serves the function of compensating for any differences between the net asset value per Creation Unit and the Redemption Securities. Thus, the Cash Component is equal to the difference between (x) the net asset value per Creation Unit of the Fund and (y) the market value of the Redemption Securities. If (x) is more than (y), the Authorized Participant will receive the Cash Component from the Fund. If (x) is less than (y), the Authorized Participant will pay the Cash Component to the Fund.

If the Redemption Securities on a Business Day are different from the Deposit Securities, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the Adviser through the Custodian makes available through NSCC the name and amount of each Redemption Security in the current Redemption Basket (based on information at the end of the previous Business Day) for the Fund and the (estimated) Cash Component, effective through and including the previous Business Day, per Creation Unit. If the Redemption Securities on a Business Day are different from the Deposit Securities, all redemption requests that day will be processed outside the Clearing Process.

The right of redemption may be suspended or the date of payment postponed: (i) for any period during which the NYSE is closed (other than customary weekend and holiday closings); (ii) for any period during which trading on the NYSE is suspended or restricted; (iii) for any period during which an emergency exists as a result of which disposal of the Shares or determination of the ETF's NAV is not reasonably practicable; or (iv) in such other circumstances as permitted by the SEC, including as described below.

Custom Redemptions and Cash-in-lieu

A Fund may, in its sole discretion, permit or require the substitution of cash-in-lieu to be added to the Cash Component to replace any Redemption Security. A Fund may permit or require cash-in-lieu when, for example, a Redemption Security may not be available in sufficient quantity for delivery or may not be eligible for transfer through the systems of DTC or the Clearing Process. Similarly, the Fund may permit or require cash-in-lieu of Redemption Securities when, for example, the Authorized Participant or its underlying investor is restricted under U.S. or local securities law or policies from transacting in one or more Redemption Securities. A Fund will comply with the federal securities laws in satisfying redemptions with Redemption Securities, including that the Redemption Securities are sold in transactions that would be exempt from registration under the Securities Act. All redemption requests involving cash-in-lieu are considered to be "Custom Redemptions."

Redemption Requests

To redeem a Creation Unit, an Authorized Participant must submit an irrevocable redemption request to the Distributor.

An Authorized Participant submitting a redemption request is deemed to represent to a Fund that it has ascertained or has reasonable grounds to believe that as of the time of the contractual settlement date, that (i) it or its customer, as the case may be, owns, will own or have the authority and right to tender for redemption the Creation Unit to be redeemed and can receive the entire proceeds of the redemption, and (ii) all of the Shares that are in the Creation Unit to be redeemed have not been loaned or pledged to another party nor are they the subject of a repurchase agreement, securities lending agreement or such other arrangement that would preclude the delivery of such Shares to the Fund on the contractual settlement date. The Fund reserves the absolute right, in its sole discretion, to verify these representations, but will typically require verification in connection with higher levels of redemption activity and/or short interest in the Fund. If the Authorized Participant, upon receipt of a verification request, does not provide sufficient verification of the requested representations, the redemption request will not be considered to be in proper form and may be rejected by the Fund.

Timing of Submission of Redemption Requests

An Authorized Participant must submit an irrevocable redemption order no later than the Cut-off Time. The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the "Transmittal Date." A redemption request is deemed received if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating Custom Redemptions and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve System, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the Settlement Date, as defined above.

Requests Using the Clearing Process

If available, (portions of) redemption requests may be settled through the Clearing Process. In connection with such orders, the Distributor transmits on behalf of the Authorized Participant, such trade instructions as are necessary to effect the redemption. Pursuant to such trade instructions, the Authorized Participant agrees to deliver the requisite Creation Unit(s) to the Fund, together with such additional information as may be required by the Distributor. Cash Components will be delivered using either the Clearing Process or the Federal Reserve System, as described above.

Requests Outside the Clearing Process

If the Clearing Process is not available for (portions of) an order, Redemption Baskets will be delivered outside the Clearing Process. Orders outside the Clearing Process must state that the DTC Participant is not using the Clearing Process and that the redemption will be effected through DTC. The Authorized Participant must transfer or cause to be transferred the Creation Unit(s) of shares being redeemed through the book-entry system of DTC so as to be delivered through DTC to the Custodian by 10:00 a.m., Eastern Time, on received T+1. In addition, the Cash Component must be received by the Custodian by 12:00 p.m., Eastern Time, on T+1. If the Custodian does not receive the Creation Unit(s) and Cash Component by the appointed times on T+1, the redemption will be rejected, except in the circumstances described below. A rejected redemption request may be resubmitted the following Business Day.

Orders involving foreign Redemption Securities are expected to be settled outside the Clearing Process. Thus, upon receipt of an irrevocable redemption request, the Distributor will notify the Adviser and the Custodian. The Custodian will then provide information of the redemption to the Fund's local sub-custodian(s). The redeeming Authorized Participant, or the investor on whose behalf is acting, will have established appropriate arrangements with a broker-dealer, bank or other custody provider in each jurisdiction in which the Redemption Securities are customarily traded and to which such Redemption Securities (and any cash-in-lieu) can be delivered from the Fund's accounts at the applicable local sub-custodian(s).

Acceptance of Redemption Requests

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust. The Trust's determination shall be final and binding.

Delivery of Redemption Basket

Once the Fund has accepted a redemption request, upon next determination of the Fund's NAV, the Fund will confirm the issuance of a Redemption Basket, against receipt of the Creation Unit(s) at such NAV, any cash-in-lieu and Transaction Fee. A Creation Unit tendered for redemption and the payment of the Cash Component, any cash-in-lieu and Transaction Fee will be effected through DTC. The Authorized Participant, or the investor on whose behalf it is acting, will be recorded on the book-entry system of DTC.

The Redemption Basket will generally be delivered to the redeeming Authorized Participant within T+3. Except under the circumstances described below, however, a Redemption Basket generally will not be issued until the Creation Unit(s) are delivered to the Fund, along with the Cash Component, any cash-in-lieu and Transaction Fee.

In certain cases, Authorized Participants will create and redeem Creation Units on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

With respect to orders involving foreign Redemption Securities, the Fund may settle Creation Unit transactions on a basis other than T+3 in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances. When a relevant local market is closed due to local market holidays, the local market settlement process will not commence until the end of the local holiday period.

Cash Redemption Method

When cash redemptions of Creation Units are available or specified for the Fund, they will be effected in essentially the same manner as in-kind redemptions. In the case of a cash redemption, the investor will receive the cash equivalent of the Redemption Basket minus any Transaction Fees, as described above.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax adviser regarding their investment in the Fund.

The Fund intends to qualify as regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, The Fund should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of the Fund will be computed in accordance with Section 852 of the Code.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carryforward of the Fund. Capital losses incurred after January 31, 2011 may now be carried forward indefinitely and retain the character of the original loss. Under pre-enacted laws, capital losses could be carried forward to offset any capital gains for eight years, and carried forward as short-term capital, irrespective of the character of the original loss. Capital loss carry forwards are available to offset future realized capital gains. To the extent that these carry forwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders.

At April 30, 2023, the Fund had capital loss carry forwards for federal income tax purposes available to offset future capital gains and utilized capital loss carryforwards as follows:

<u>Short-Term</u>	<u>Long-Term</u>	<u>Total</u>	<u>CLCF Utilized</u>
\$3,260,633	\$ —	\$ 3,260,633	\$ —

The Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the Code and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income and net capital gain will be made after the end of each fiscal year, and no later than December 31 of each year. Both types of distributions will be in shares of The Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Code, the Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of the Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which the Fund controls and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If the Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it may be able to pay a tax penalty on the portion of income that caused it to inadvertently violate Subchapter M or it will be treated as a corporation for federal income tax purposes. If treated as a corporation, the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of the Fund generally would not be liable for income tax on the Fund's net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from the Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

The Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Fund's ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year

period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to the Fund during the preceding calendar year. Under ordinary circumstances, the Fund expects to time its distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Code.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as long-term capital gain, regardless of the length of time the shares of the Fund have been held by such shareholders.

For taxable years beginning after December 31, 2012, certain U.S. shareholders, including individuals and estates and trusts, will be subject to an additional 3.8% Medicare tax on all or a portion of their "net investment income," which should include dividends from the Fund and net gains from the disposition of shares of the Fund. U.S. Shareholders are urged to consult their own tax advisers regarding the implications of the additional Medicare tax resulting from an investment in the Fund.

A redemption of the Fund's shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the net asset value of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Code, the Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt

shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if the Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Other Reporting and Withholding Requirements

Payments to a shareholder that is either a foreign financial institution (“FFI”) or a non-financial foreign entity (“NFFE”) within the meaning of the Foreign Account Tax Compliance Act (“FATCA”) may be subject to a generally nonrefundable 30% withholding tax on: (a) income dividends paid by the Fund after June 30, 2014 and (b) certain capital gain distributions and the proceeds arising from the sale of Fund shares paid by the Fund after December 31, 2016. FATCA withholding tax generally can be avoided: (a) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if it enters into a valid agreement with the IRS to, among other requirements, report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them. The Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Fund, the Fund’s transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund’s securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, a certain percentage of the Fund’s hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund’s book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund’s remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient’s basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund’s book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regular investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by the Fund in certain passive foreign investment companies ("PFICs") could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to Fund shareholders. However, the Fund may elect to treat a PFIC as a qualified electing fund ("QEF election"), in which case the Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether they receives any distribution from the company.

The Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return.

Foreign Currency Transactions

The Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Foreign Taxation

Income received by the Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to the Fund's shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by the Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of the Fund's taxable year whether the foreign taxes paid by the Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to shareholders of the Fund. With respect to the Fund, gains from the sale of securities will be treated

as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by the Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income which is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by the Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

The Fund that holds the foregoing kinds of securities may be required to pay out as an income distribution each year an amount, which is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of the Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year the Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisers about the application of federal, state and local and foreign tax law in light of their particular situation.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board has selected RSM US LLP located at 555 Seventeenth Street, Suite 1200 Denver, Colorado 80202, as its independent registered public accounting firm for the current fiscal period. The firm provides services including (i) audit of annual financial statements, and (ii) other audit, tax, and related services for the Fund.

LEGAL COUNSEL

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, Ohio 43215, serves as the Trust's legal counsel.

FINANCIAL STATEMENTS

The financial statements and report of the independent registered public accounting firm required to be included in this SAI are hereby incorporated by reference to the Annual Report of the Fund for the fiscal year ended April 30, 2023. You can obtain a copy of the Annual Report without charge by calling the Funds at 1-888-604-5506.

Appendix A

PROXY VOTING POLICIES AND PROCEDURES OF TOEWS CORPORATION

BACKGROUND

Proxy voting is an important right of shareholders and reasonable care and diligence must be undertaken to ensure that such rights are properly and timely exercised.

Investment advisers registered with the SEC, and which exercise voting authority with respect to client securities, are required by Rule 206(4)-6 of the Advisers Act to (a) adopt and implement written policies and procedures that are reasonably designed to ensure that client securities are voted in the best interests of clients, which must include how an adviser addresses material conflicts that may arise between an adviser's interests and those of its clients; (b) to disclose to clients how they may obtain information from the adviser with respect to the voting of proxies for their securities; (c) to describe to clients a summary of its proxy voting policies and procedures and, upon request, furnish a copy to its clients; and (d) maintain certain records relating to the adviser's proxy voting activities when the adviser does have proxy voting authority.

POLICY

Adviser, as a matter of policy and practice, has no authority to vote proxies on behalf of separate account advisory clients. The firm may offer assistance as to proxy matters upon a client's request, but the client always retains the proxy voting responsibility. Adviser's policy of having no proxy voting responsibility is disclosed to clients. Adviser will also ensure that custody arrangements with clients do not assign proxy voting authority to the Adviser.

As to each client that is a registered investment company, a Fund, Adviser employs "tactical" strategy by investing in a combination of securities in the companies and derivatives using technical analysis that it believes will produce economic exposure along a continuum similar to that of the securities of broad-based indices. As a result of tactical moves, when a fund holds individual company securities, Adviser exercises the Fund's proxy voting rights with regard to the companies in that Fund's investment portfolio, but Adviser recognizes that the goals of maximizing the value of the Fund's investments, promoting accountability of a company's management and board of directors to its shareholders, aligning the interests of management with those of shareholders, and increasing transparency of a company's business and operations are challenging to implement from the tactical point of view.

In order to meet its fiduciary obligation to the Funds while employing the tactical strategy mandated by each Fund, Adviser has contracted with a third-party service provider Toews will vote in a manner that balances employing the tactical implementation and attempting to provide for greatest shareholder value using data driven guidelines derived from publicly disclosed voting records of fund families selected by assets under management. The adviser believes that in addition to fulfilling its fiduciary obligation, using the data driven guidelines developed by the unaffiliated third-party service provider provides not only a level of independence, but also eliminates any potential conflicts that might arise. Adviser has implemented a review process to oversee the proxies voted by a third-party service provider to ensure that all votes have met the data driven guidelines and to provide assurance of no potential conflicts.

Proxy and Mirror Voting for Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies. Section 12(d)(1)(A) states that a registered investment company may not invest in the securities of another investment company if the acquiring investment company owns more than 3% of the total outstanding

voting securities of the acquired investment company; the acquiring investment company owns securities issued by the acquired investment company with an aggregate value greater than 5% of its total assets; or the acquiring investment company owns securities issued by the acquired investment company and all other investment companies having an aggregate value greater than 10% of the value of its total assets.

The provisions in section 12(d)(1)(A) do not apply if the purchase or acquisition is made pursuant to an arrangement or agreement with the issuer of, or principal underwriter of the acquired investment company whereby the acquiring investment company is required to either seek instructions from its shareholders with regard to the voting of all proxies with respect to the acquired investment company and to vote such proxies in accordance with shareholder instructions, or to vote the shares held by it in the same proportion as the vote of all shareholders of the acquiring investment company.

RESPONSIBILITY

Separately Managed Accounts

The CCO has the responsibility for the implementation and monitoring of its proxy policy and to ensure that the firm does not accept or exercise any proxy voting authority on behalf of separate account advisory clients without an appropriate review and change of the firm's policy with appropriate regulatory requirements being met and records maintained.

Registered Investment Companies

The CCO has the responsibility for the implementation and monitoring of its proxy policy and to ensure that the proxy voting using a third-party service provider is exercised as outlined in the firm's policy.

PROCEDURE

Separately Managed Accounts Proxy Voting Process

Adviser has adopted various procedures to implement the firm's policy and conducts reviews to monitor and ensure the firm's policy is observed, implemented properly, and amended or updated, as appropriate, which include the following:

- Adviser discloses its proxy voting policy of not having proxy voting authority in its Firm Brochure or other client information for separate account advisory clients;
- Adviser's advisory agreements and client custodial agreements provide that the firm has no proxy voting responsibilities and that the advisory clients expressly retain such voting authority;
- If Adviser's new client information materials indicate that advisory clients retain proxy voting authority, then the advisory clients vote the proxies without Adviser's involvement;
- The CCO reviews the nature and extent of advisory services provided by the firm and monitors such services annually to determine and confirm that client proxies are not being voted by the firm or anyone within the firm for separate account advisory clients.

Registered Investment Company Fund Clients Proxy Voting Guidelines

Toews has contracted with a third-party service provider for a service ("Shareholder Value Template", "SV Template") that has extracted meeting proposals, categorized, and linked all voting records from the N-PX filings of certain fund families selected by assets under management. Each recorded vote by such fund family is categorized based on the proposal type. Toews will vote proxies based on the following rules:

- If greater than 60% voted FOR the proposal, the SV Template reflects “FOR”;
- If between 40-60% vote FOR on the proposal, the SV Template reflects “WITH MANAGEMENT”;
- If less than 40% vote FOR the proposal, the SV Template reflects “AGAINST”;
- With respect to proposals with detailed data points (e.g., Election of Directors, Ratification of Auditors, Proxy Access), guidelines will reflect the most common voting policies; and
- With respect to a number of proposal types with limited voting information from the N-PX filing to reflect FOR or AGAINST, the SV Template will reflect With Management as a default.
- With respect to the FOR percentage calculations, all “Not” votes shall be excluded.

The guidelines will reflect proposals categorized as Provide Right To Call Special Meetings to vote “FOR.”

The third-party service provider reviews the guidelines on a regular basis and new rules and categories are created from time to time, always using the logic described above. The guidelines only reflect the actual recorded voting behavior based on the logic described above.

Proxies for Other Investment Companies

Adviser serves as investment adviser to open-end investment companies established as open-end mutual funds and exchange traded funds (“ETFs”) under the Northern Lights Fund Trust (together “Fund Clients”). The Fund Clients are required by the 1940 Act to handle proxies received from Underlying Funds in a certain manner.

Rule 12d1-4 treats all registered funds in a uniform manner. Each registered investment company client may act as an acquiring or acquired fund. To rely on Rule 12d1-4, a fund of funds arrangement must satisfy the following conditions:

- Control and Voting: an acquired fund may not control an acquired fund. Accordingly, in most cases an acquiring fund and its advisory group may purchase up to 25% of an acquired fund’s outstanding shares. However, the 25% cap creates merely a presumption as to lack of control. In no circumstances may an acquiring fund and its advisory group exercise a controlling influence on the acquired fund’s management or policies, regardless of its level of share ownership.
- An acquiring fund and its advisory group must use “mirror voting” if they, in the aggregate, own more than 25% of the outstanding voting securities of an acquired open-end fund due to a decrease in the outstanding securities of the acquired fund; or 10% of the outstanding voting securities of an acquired closed-end fund.

An acquiring fund and acquired fund that do not share an investment adviser must enter into a fund of funds investment agreement prior to the acquiring fund acquiring securities of the acquired fund in excess of the Section 12(d)(1) limits in reliance on Rule 12d1-4. Such an agreement must include the following:

- Any material terms necessary for Adviser, underwriter, or depositor to have made the findings regarding the acquiring fund’s investment in the acquired fund;
- A termination provision whereby either party can terminate the agreement with advance written notice within a period of no longer than 60 days; and

- A provision whereby the acquired fund must provide the acquiring fund with fee and expense information to the extent reasonably requested.

The CCO is ultimately responsible for ensuring that all proxies received by Adviser for Registered Investment Companies are voted in a timely manner and in a manner consistent with Adviser's established policies. Although the majority of proxy proposals can be handled in accordance with Adviser's established proxy policies, Adviser recognizes that some proposals require special consideration that may dictate that exceptions are made to its general procedures.

Form N-PX

Adviser is responsible for voting proxies for all portfolio securities of the Funds and keeping certain records relating to how the proxies were voted as required by the Advisers Act. Adviser and the Sub-Adviser shall provide a complete voting record for the Funds, as requested.

Annual Report of Proxy Voting Record

Form N-PX is used by Funds to file reports with the SEC containing the Fund's proxy voting record for the most recent 12-month period ending June 30. The Form must be filed not later than August 31 of each year. The following information must be collected for the Trust separately for a Fund in order to complete and file Form N-PX:

1. The name of the issuer of the Fund security;
2. The exchange ticker symbol of the Fund security;
3. The CUSIP number (may be omitted if not available through reasonably practicable means);
4. The shareholder meeting date;
5. A brief description of the matter voted on;
6. Whether the matter was proposed by the issuer or the security holder;
7. Whether the Fund cast its vote on the matter;
8. How the Fund cast its vote (e.g., for or against proposal, or abstain; for or withhold regarding election of directors)
9. Whether the Fund cast its vote for or against management
10. The Funds may invest in other mutual funds and ETFs, which have no requirement to have an annual meeting. Therefore, proxy votes on mutual funds and ETFs are rare.

Compliance Process

1. Adviser shall complete a Form N-PX Report at the time Adviser votes proxies on behalf of a Fund.
2. Adviser shall keep one copy of each completed Form N-PX Report and deliver a copy to the CCO.

3. At least 30 days prior to August 31, the CCO shall review Adviser' corporate action records to determine whether any proxy votes were cast on behalf of the Fund for which reports were not filed. If an unreported vote is discovered, the CCO shall contact Adviser for an explanation and documentation.
4. The CCO shall compile all Form N-PX reports submitted for the 12-month period ended June 30 and complete Form N-PX.
5. Completed Form N-PX shall be sent to the Administrator who shall file Form N-PX with the SEC.

Proxy Records

Adviser must retain five types of records relating to proxy voting:

- Proxy voting policies and procedures;
- Proxy statements received for client and fund securities;
- Records of votes cast on behalf of clients and funds;
- Records of written requests for proxy voting information and written responses from the adviser to either a written or oral request; and
- Any documents prepared by the adviser that were material to making a proxy voting decision or that memorialized the basis for the decision.

Overseeing Proxy Voting Advisors

At least annually, Adviser monitors the services provided by the third-party service provider to evaluate whether it has the capacity and competency to adequately provide data driven guidelines derived from publicly disclosed voting records of fund families selected by assets under management. Monitoring may include some or all of the following:

- Periodically sampling proxy votes to review compliance with its policies and procedures or specifically reviewing a sample of proxy votes that relate to certain proposals that may require additional analysis.
- Consider the adequacy and quality of the third-party service provider's policies and procedures regarding its ability to ensure that the data driven guidelines derived from publicly disclosed voting records of fund families are accurate.
- Reviewing the timeliness of the research provided – this may entail reviewing how far in advance of proxy voting data is received before the meeting date and proxy voting cut-off date.
- Reviewing the accuracy in applying the votes to the data driven guidelines. This may entail taking a sampling of shareholder votes and determining whether they were voted in accordance with the Adviser's proxy voting guidelines.
- Reviewing potential conflicts of interest – the third-party service provider's conflicts of interest should be mitigated since the guidelines are derived from publicly disclosed voting records of fund families selected by assets under management. However, Adviser should track relationships of the third-party proxy advisory firm that may impose conflicts of interest and how the proxy advisory firm resolves them.

Adviser shall review, at least annually, the adequacy of these Proxy Voting policies and procedures.
